

Ubee® DOCSIS 3.0

8x4 Batteryless

Advanced Wireless Voice Gateway

Model: **DVW324**

## DVW324 Device Highlights

**High Speed** – Increased bandwidth for subscribers' multimedia and high-bandwidth applications with speeds up to 300 Mbps downstream\* and 100 Mbps upstream.\*

**Advanced Wireless** – Eight SSIDs offer flexibility for the customer's network. MSOs can reserve SSIDs for hotspots, guest access, and applications.

**Security** – Security authentication and encryption standards prevent unauthorized access to the wireless network including: WPA/WPA2, WPS, and SPI Firewall. IPv4 & IPv6 support enables increased address capacity and improved security.

**Network Interface** – Four 10/100/1000 Ethernet interfaces for high-speed LAN capability. One USB port with host controller is also available.

**Voice** – Two analog telephone connections. Without battery capability, the DVW324 is an economical solution for MSOs that do not need battery backup.

**Full Band Capture** – For channel lineup flexibility like no "block" tuner restrictions such as all DOCSIS bonding in certain frequency window and keeping voice service on existing channels.

**Enhanced Diagnostic Capabilities** – High performance spectrum analyzer helps reduce troubleshooting costs.

\* - Actual speeds vary based on factors such as network configuration and service tier.

DVW324 Advanced Voice Wireless Gateway

## Overview

Ubee introduces the **DVW324 Advanced Wireless Voice Gateway**. With increased data throughput, the DVW324 targets residential and Small Office/Home Office (SOHO) customers by delivering 802.11n wireless speeds, excellent wireless coverage, Gigabit LAN performance, and high-tier WAN speeds. The DVW324 reduces operational expenditure (OpEx) by eliminating the need for multiple devices in the SOHO or the MSO warehouse. Additional features include:

- **Speeds and Compatibility** — By supporting Gigabit Ethernet and 802.11n, the DVW324 offers LAN and wireless speeds that take advantage of higher speed tiers offered by DOCSIS 3.0. Further, the DVW324 is fully backwards compatible with 10/100 Ethernet, 802.11b/g wireless, and DOCSIS 1.0/1.1/2.0.
- **QoS** — Quality of Service features enable traffic prioritization for delay-sensitive multimedia services and applications.
- **Power Savings** — The DVW324 is Energy Star compliant and supports UAPSD power savings. UAPSD interacts with connected wireless clients prompting them to doze and save power when possible.
