WIRELESS-G ROUTER

High Performance Networking Made Easy

Unparalleled easy networking

The Microsoft® Broadband Networking Wireless Base Station makes it easy to set up an 802.11g wireless network and share a single broadband connection across all the computers in your home or small office.

- **Unique software installation wizard** walks you easily through setup.
- Intelligent software automatically detects your Internet service and modem settings for easy base station configuration.
- **Superior graphical Broadband Network Utility** makes it easy to manage your network.
- Exclusive Microsoft automatic update keeps your software current.
- Best-in-class UPnP™ (universal plug and play) device enables you to easily play games and send voice and video over the Internet.

Breakthrough performance

- Smart Windows® CE-powered expandable platform delivers the power and flexibility for your current and future needs.
- Lightning-fast 54 Mbps delivers up to five times the network speed of 802.11b networks.
- Enjoy wireless freedom—playing music, games, and video anywhere.
- State-of-the-art hardware with one WAN and four LAN 10/100 auto-sensing and auto-crossover ports.
- Versatile Ethernet and wireless capability connects up to 253 wireless and wired computers.

Critically acclaimed high security

- State-of-the-art secured connection to your office using Virtual Private Network (VPN) passthrough and tunneling.
- Advanced parental controls help restrict children or employees from visiting inappropriate Web sites and can limit time on the Internet.
- Flexible support for 256-bit Wi-Fi Protected Access (WPA) and 128-bit Wired Equivalent Privacy (WEP) delivers strong wireless security.
- Commercial-grade, built-in hardware Stateful Packet Inspection (SPI) firewall and Network Address Translation (NAT) help protect against unauthorized access.
- Advanced Media Access Control (MAC) and client filtering help protect against unauthorized access to your wireless network.

Designed for
Microsoft® Windows® XP, 2000, ME, 98
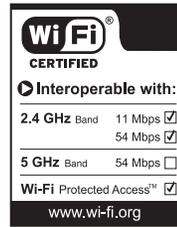

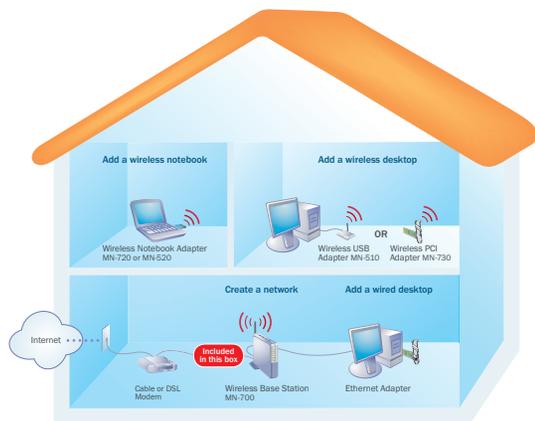

Included in the box:

- Microsoft® Broadband Networking Wireless Base Station—802.11g wireless cable/DSL router and access point with 4-port Ethernet switch (Dimensions: 1.2" x 5.3" x 6.8")
- Software CD with the easy-to-use setup wizard and Microsoft Broadband Network Utility
- *Start Here* guide
- *User's Guide*
- Power supply
- Ethernet cable
- Blank 3.5" high-density disk for your network settings

System Requirements:

To use the Microsoft® Broadband Networking Wireless Base Station MN-700, you need:

- Computer to configure base station
- External broadband (DSL, cable, or other) modem with Ethernet-to-computer capability
- Microsoft Internet Explorer 5.0 or Netscape Navigator 6.0 or later to view and use base station HTML configuration screens
- Available AC power outlet

To use the Microsoft Broadband setup wizard and Network Utility, you need:

- PC running Microsoft Windows® 98, Windows 98 SE, Windows Millennium Edition (Windows Me), Windows 2000 Professional, Windows XP Professional, or Windows XP Home Edition operating system
- Microsoft Internet Explorer 5.0 or later; setup will install Internet Explorer 6.0 browser components if needed, but will not displace your primary browser
- 132 MB of available hard-disk space if you are installing Internet Explorer for the first time; 40 MB of available hard-disk space if you already have Internet Explorer 5.5 or 6.0 installed
- 4x CD-ROM drive
- VGA or higher-resolution monitor; Super VGA recommended
