

## Product Highlights

### For Small Business-Class Environments

2.4GHz 802.11n connectivity for increased network capacity, high power radio design and ideal for indoor deployments.

### Multiple Operation Modes

Access Point, Wireless Distribution System (WDS)/ Bridge, Point-to-Point, Point-to-Multiple-Points, WDS with AP and Wireless Client modes.

### High Performance Connectivity

IEEE 802.11n Wireless, Up to 300 Mbps transfer rates and 1 10/100/1000 Gigabit PoE port.

## DAP-2310

# AirPremier® N 2.4GHz High Power Access Point

## Features

### Security Features:

- WPA2™ - Enterprise/Personal
- WPA™ - Enterprise/Personal
- WPA2™ - PSK/AES over WDS
- 64/128 -bit WEP Encryption
- MAC Address Filtering
- 802.1X

### Easy Management:

- Web Browser (HTTP/HTTPS)
- Telnet
- SNMP v1, v2c, and v3
- AP Manager II
- SSH
- D-View 5.1 and 6.0
- AP Array

The DAP-2310 *AirPremier* N 2.4GHz High Power Access Point is a Single Band 802.11n access point ideal for any small or medium business that requires reliable wireless performance coupled with robust security in a cost effective and easy to deploy package. With transfer rates of up to 300 Mbps in the 2.4 GHz N frequency range, users are able to connect with legacy 802.11b/g adapters in addition to the latest 802.11n adapters to enjoy faster downloads and instant communication.

## Versatile Access Point

The DAP-2310 allows network administrators to deploy a highly manageable and extremely robust 802.11n wireless network. The included antennas are detachable and provide optimal wireless coverage in the 2.4 GHz (802.11g and 802.11n) band using a high power radio design to reduce dead spots and increase capacity. For advanced installations, this high-speed access point has integrated 802.3af Power over Ethernet (PoE), making installation easy in areas where power outlets are not readily available.

## Enhanced Performance

The DAP-2310 delivers fast reliable wireless performance with maximum wireless signal rates of up to 300 Mbps this coupled with support for Wi-Fi Multimedia (WMM™) Quality of Service features, makes it an ideal access point for audio, video, and voice applications. Additionally, the DAP-2310 supports load balancing features to ensure maximum performance by limiting the maximum number of users per Access Point.

### Security

To help maintain a secure wireless network, the DAP-2310 provides the latest in wireless security technologies including:

- Personal and Enterprise WPA and WPA2 (802.11i) Support
- RADIUS Authentication, MAC Address Filtering, Rogue AP Detection
- Wireless LAN segmentation with support for up to eight VLANs
- Disable SSID Broadcast and Wireless Broadcast Scheduling
- Wireless client isolation limiting direct client-to-client communication

### Multiple Operation Modes

To maximize return on investment, the DAP-2310 can be configured to optimize network performance based on any one of its multiple operation modes:

- Access Point, Wireless Client
- Wireless Distribution System (WDS)
- WDS with Access Point

With WDS support, network administrators can set up multiple DAP-2310 access points throughout a facility and configure them to bridge with one another while providing network access to individual clients. Advanced features such as Load Balancing, optimizes high network traffic volume with redundancy for fail-safe wireless connectivity.

### Network Management

Network administrators have multiple options for managing the DAP-2310, including; internal Web interface (HTTP/HTTPS), Secure Sockets Layer (SSL), Secure Shell (SSH) and Telnet. For advanced network management, administrators can use the D-Link AP Manager II or D-View SNMPv3 management module to configure and manage multiple access points from a single location. In addition to a streamlined management process, the AP Manager II and D-View software provides network administrators with the means to verify and conduct regular maintenance checks remotely, eliminating the need to send personnel out to physically verify proper operation.

With up to 300 Mbps 2.4 GHz N band functionality, extensive management options, versatile operation modes, and Enterprise level security, the D-Link DAP-2310 AirPremier N 2.4GHz High Power Access Point provides SMB and SME environments with a powerful business-class wireless solution.

# DAP-2310 AirPremier® N 2.4GHz High Power Access Point

Dipole Antenna Gain	• 2 dBi @ 2.4 GHz
Maximum Transmit Output Power	• FCC : 25 dBm
LEDs	• Power • LAN • WLAN
<b>General Specifications</b>	
Max. Power Consumption	• 9 watts
Operating Voltage	• 5 V/2 A or PoE
Operating Temperature	• 32 to 104 °F (0 to 40 °C)
Storage Temperature	• -4° to 149° F (-20° to 65° C)
Operating Humidity	• 10% to 90% non-condensing
Storage Humidity	• 5% to 95% non-condensing
Weight	• 0.525lbs (238 grams)
Certifications	• FCC (Class B) • CE • WiFi®
Dimensions	• Length: 4.4" (111mm) • Width: 5.8" (148mm) • Height: 1.1" (28mm)
<b>Warranty</b>	
Warranty	Limited Lifetime <sup>1</sup>
<b>Order Information</b>	
<i>Part Number</i>	<i>Description</i>
DAP-2310	DAP-2310 AirPremier® N 2.4GHz High Power Access Point

<sup>1</sup> Limited Lifetime Warranty available only in the USA and Canada. All references to speed are for comparison purposes only. Product specifications, size and shape are subject to change without notice, and actual product appearance may differ from that depicted herein.
