

Ubee DOCSIS 3.0 Advanced Wireless Voice Gateway Model: **UBC1307**

UBC1307 Device Highlights

- High Speed** - The UBC1307 delivers increased bandwidth for subscribers' multimedia and high-bandwidth applications (up to 343 Mbps downstream, 122 Mbps upstream).*
- Enhanced Wireless** - The UBC1307 provides 8 SSIDs that offer considerable flexibility for the customer's network. MSOs can reserve SSIDs for hotspots, guest access, and other applications.
- Security** - The UBC1307 delivers the latest security authentication and encryption standards to prevent unauthorized access to the wireless network. These include WPA/WPA2, WPS, and SPI Firewall.
- Network Interface** - 2 10/100/1000 Ethernet interfaces provide high speed LAN capability. IPv4 and IPv6 support enables increased address capacity and improved security.
- Full Band Capture** - For channel lineup flexibility: No "block" tuner restrictions such as all DOCSIS bonding in certain frequency window. Keeps voice service on existing channels.
- Diagnostic Capability** - Integrated high performance spectrum analyzer helps reduce troubleshooting costs.
- Voice** - The UBC1307 offers one analog telephone connection. Without battery capability, it is an economical solution for MSOs that do not need battery backup.

* Actual speeds vary based on factors such as network configuration and service tier.

Overview

Ubee introduces the **UBC1307-CA00 Advanced Wireless Voice Gateway**. The UBC1307 blends high-speed LAN capabilities with the convenience of wireless networking, and analog telephony in one device. It is well-suited to deliver multiple networking capabilities for the contemporary demands of residential and Small Office/Home Office (SOHO) subscribers. The UBC1307 reduces operational expenditures (OpEx) by eliminating the need for multiple devices in the home/office or the MSO warehouse. Additional features include:

- Speeds and Compatibility** - By supporting Gigabit Ethernet and 802.11n, the UBC1307 offers LAN and enhanced wireless speeds to take advantage of higher speed tiers offered by DOCSIS 3.0. It is fully backwards compatible with 10/100 Ethernet, 802.11 b/g wireless, and DOCSIS 1.x/2.0 standards.
- QOS** - Quality of Service (QOS) features enable traffic prioritization for delay-sensitive multimedia services and applications.
- Power Savings** - The UBC1307 offers UAPSD power savings, interacting with connected wireless clients, prompting them to doze and save power whenever possible. The UBC1307 buffers downlink data until the client awakens.
- Miscellaneous** - Energy Star compliant, file sharing, DLNA and network setup.
