

Product User's Guide

Chapter 1

About Your Product

[INSERT IMAGE WITH TIPS HERE]

Status bar

At the top of the screen, you'll see indicators that inform you about the status of your Product.

Wi-Fi indicator: The more bands that are filled in with white, the stronger the Wi-Fi signal. An X next to the Wi-Fi icon indicates that you have a connection to Wi-Fi but you do not have a connection to the Internet. This can occur if you are at a Wi-Fi hot spot, such as an airport or coffee shop. Open your Web browser to view access options that may be available.

To turn on your Product, press and release the power button. To put it in sleep mode, press and release the power button. To turn off your Product, press and hold the power button until a message displays asking if you want to shut down. If your device becomes unresponsive during use, you can restart it by pressing and holding the power button for 20 seconds.

Your Product will be partially charged when you receive it. To charge your device, connect it to a power outlet using the included power adapter. The charging indicator light is orange during charging and green when fully charged. Fully charging may take up to four hours.

Settings

[Insert diagram and tips here]

Locked/Unlocked: Select to lock/unlock screen rotation.

Volume: Lets you adjust the volume.

Brightness: Use the slider to adjust the screen brightness. Select “Automatic Brightness” to let your Product adjust screen brightness automatically based upon the ambient light.

Wi-Fi: Select to toggle wireless on or off, display a list of detected Wi-Fi networks, and add a network.

Sync: Tap to sync your device with your cloud content. You must have a network connection to sync.

Wireless Network: Select to toggle wireless on or off, display a list of detected Wi-Fi networks, add a network, and access advanced wireless settings.

Device: Displays available storage space, device serial number, Wi-Fi MAC address, system version, and an option to reset to factory defaults. Please note that resetting your Product to its original factory settings removes all personal data, downloaded content and applications from your device.

Legal: Provides trademark, copyright, and other notices about the software installed on your Product.

Product Information

Safety and Compliance Information

[Insert user instructions for safe use of the product]

Wireless Safety and Compliance

Turn off your wireless connection in areas where wireless use is forbidden or when it may cause interference or danger. Some specific situations are described below. In general, you should not use your Product with your wireless connection turned on any place you are not allowed to use a mobile device.

Turn Off Wireless When Flying

To prevent possible interference with aircraft systems, the U.S. Federal Aviation Administration regulations and many other aviation agencies require you to have permission from a crew member to use your device's wireless service.

Using Your Product Around Other Electronic Devices

Product generates, uses, and can radiate radio frequency (RF) energy and, if not used in accordance with its instructions, may cause interference to radio communications and electronic equipment. External RF signals may affect improperly installed or inadequately shielded electronic operating systems, entertainment systems, and personal medical devices. While most modern electronic equipment is shielded from external RF signals, if in doubt, check with the manufacturer. For personal medical devices (such as pacemakers and hearing aids), consult with your doctor or the manufacturer to determine whether they are adequately shielded from external RF signals.

Steps to Minimise Interference

If your Product does cause interference to radio or television reception (which you can determine by turning your Product off and on), you can try to correct the interference by one or more of the following measures: reorient or relocate the receiving antenna for the radio or television; increase the separation between the radio or television and your Product; connect equipment and receivers to different outlets; or consult the radio or television manufacturer or an experienced radio/TV technician for help.

Watch for Signs

There are some places where RF signals could constitute a hazard, such as health care facilities, and construction sites. If you are not sure, look around for signs indicating that two-way radios or mobile phones should be turned off.

In addition, turn off and do not charge your device if you are in any area with a potentially explosive atmosphere, as sparks in such areas could cause an explosion or fire. Such areas are usually, but not always, clearly identified, and include areas where you would normally be advised to turn off your vehicle engine.

FCC Compliance Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device meets the FCC Radio Frequency Emission Guidelines and is certified with the FCC as the FCC ID number found on the back of the device.

Information Regarding Exposure to Radio Frequency Energy

Your Product is designed and manufactured not to exceed the emission limits for exposure to RF energy set by the Federal Communications Commission of the United States (FCC). Information on your Device is on file with the FCC and can be found under the Display Grant section of <http://transition.fcc.gov/oet/ea/> after searching on the FCC ID for your Device, which can be found on the back of the Device.

Canadian Compliance Statement

This device complies with the Canadian ICES-003 Class B specifications.

This device complies with RSS 210 of Industry Canada. This Class B device meets all the requirements of the Canadian interference-causing equipment regulations.

This device complies with Industry Canada license exempt RSS standard(s). Operation is subject to the following two conditions:

1. this device may not cause interference, and
2. this device must accept any interference, including interference that may cause undesired operation of the device.

This device is compliant with general population/uncontrolled RF exposure limits in IC RSS-102

Cet appareil numérique de la Classe B est conforme à la norme NMB-003 du Canada.

Cet appareil numérique de la Classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

Cet appareil est conforme aux normes CNR exemptes de licence d'Industrie Canada. Le fonctionnement est soumis aux deux conditions suivantes

1. cet appareil ne doit pas provoquer d'interférences et
2. cet appareil doit accepter toute interference, y compris celles susceptibles de provoquer un fonctionnement non souhaité de l'appareil.

Cet appareil est concilient avec les limites d'exposition de RF population/non contenu générales dans IC RSS-102

IEEE 1725 Battery Safety Statement

- Do not disassemble or open, crush, bend or deform, puncture or shred.
- Do not modify or re-manufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per this standard. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.
- Do not short-circuit a battery or allow metallic conductive objects to contact battery terminals.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725-200x. Use of an unqualified battery may present a risk of fire, explosion, leakage, or other hazard.
- Promptly dispose of used batteries in accordance with local regulations.
- Avoid dropping the device or battery. If the device or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service centre for inspection.

Recycling Product HD Properly

■ In some areas, the disposal of certain electronic devices is regulated. Make sure you dispose of or recycle your Product HD in accordance with your local laws and regulations. For information about recycling Product HD, go to [INSERT URL].

Product Specifications

Display — 7" (17 cm) diagonal display, 1280 x 800 HD display, 16 million colours.

Audio — 3.5 mm stereo headphone and microphone jack, built-in stereo speakers.

Power — AC power adaptor or USB cable and rechargeable lithium polymer battery.

Connectivity — USB 2.0 (micro-B connector).

Operating temperature — 0 °C to 35 °C (32 °F to 95 °F).

Storage temperature — -10 °C to 45 °C (14 °F to 113 °F).

Wi-Fi — Dual-band (2.4/5 GHz) SISO 802.11 a/b/g/n.
