Figure 5-4

Method 2: WPS (Wi-Fi Protected Setup)

Note: You can use method 2 only if your router also has WPS functionality.

A: Button

- Push and hold WPS button on back of Router until WPS LED flashes (or as indicated according to manufacturer)
- > Push WPS button on wireless network adapter and hold for about 3-5 seconds
- > A safe connection will be established automatically in a moment
- The reverse pushing and holding WPS button on adapter briefly, then pushing and holding WPS button on router briefly may also be utilized

B: PIN

- Select the Wi-Fi Protected Setup tab in the utility
- Choose to enter the WPS PIN of the router by ticking the Input PIN from AP box, provide router WPS PIN, and click on PIN Input Config. This PIN is often printed on a label on the router. If it is not found on the router, or has possibly been changed, you may need to access your router interface to find this PIN.
- Alternatively, you may choose to utilize a WPS PIN provided by this wireless adapter, click on PIN Input Config, and enter PIN in your router's interface.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference

to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of FCC RF Rules. Operation is subject to the following two conditions:

1) This device may not cause interference and

2) This device must accept any interference, including interference that may cause undesired operation of the device.

Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.
