Product Overview

Front view

From top to bottom

Power—Lights up green when the modem router is powered on.

Receive— Light blinks green while the modem router is searching for a connection over the cable network. Light is solid green when the modem router is receiving data from the cable network. Light is solid blue during multichannel bonding.

Send—Light blinks green while the modem router is searching for a connection over the cable network. Light is solid green when the modem router is sending data to the cable network. Light is solid blue during multichannel bonding.

Status— Lights up green when the modem router has an Internet connection. Flashes green while the modem router is establishing the Internet connection.

Ethernet—Light is solid green when the modem router is connected to a device through the LAN port.

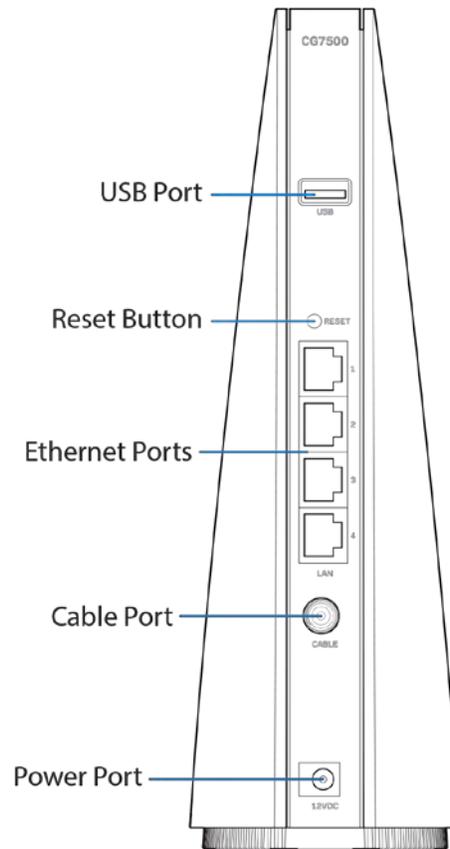

2.4 GHz Wi-Fi—Light is solid green when broadcasting 2.4 GHz signal. Light blinks when the modem router is actively sending or receiving data over the network.

5 GHz Wi-Fi—Light is solid green when broadcasting 5 GHz signal. Light blinks when the modem router is actively sending or receiving data over the network.

USB—Light is solid green when the modem router is connected to a device through the USB port.

WPS—Light is solid green when a Wi-Fi Protected Setup™ connection is successfully established. Light blinks slowly while WPS is setting up a connection, and blinks rapidly if an error occurs. Light is off when WPS is idle.

Back

From top to bottom

USB port—Connect and share a USB drive on your network or on the internet.

Reset button—Press and hold for about five seconds to reset the modem router to factory defaults.

Ethernet ports— Connect the modem router to computers and other devices with ethernet cables (also called network cables).

Cable port— Connect the modem router to an active cable signal with a coaxial cable.

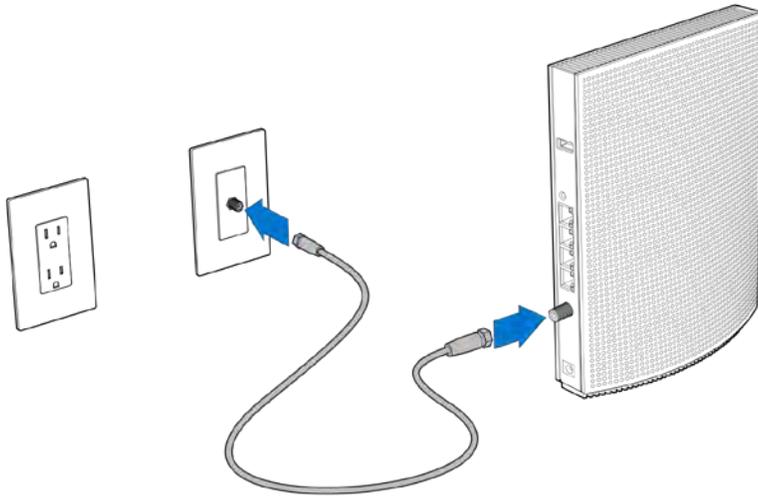

Power port—Connect to the included power adapter.

Installation

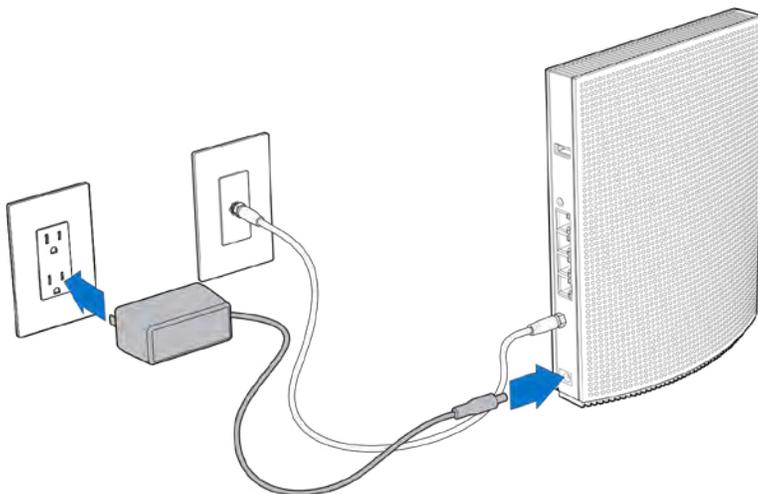

Setup

Disconnect any modems or modem routers before setting up your new modem router.

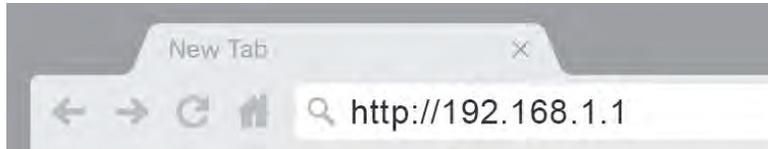

1. Connect a coaxial cable to the cable port on the modem router and a wall jack.

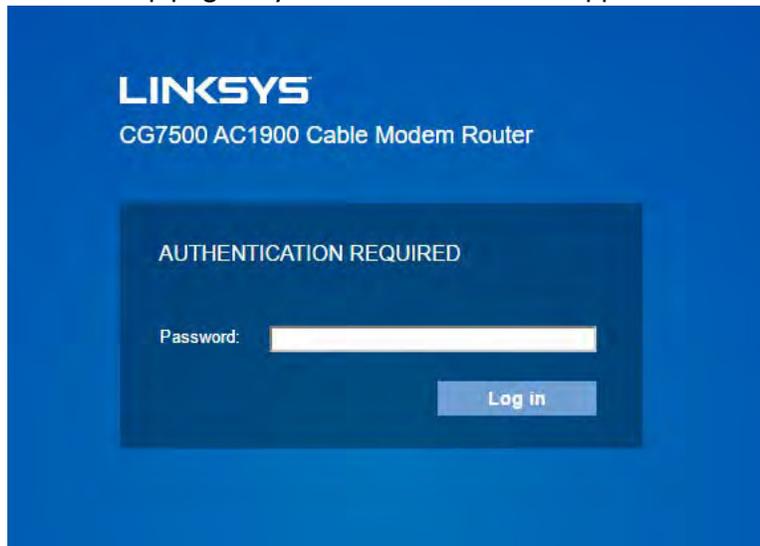

2. Connect the power adapter to the modem router and plug into a power source.

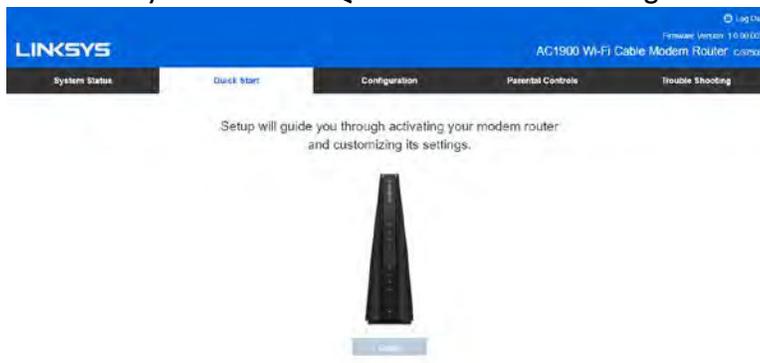

3. Connect to the secure Wi-Fi name on the sticker in the Quick Start Guide that came with your modem router. There is also a sticker on the bottom of the modem router. (You can change these details later.) Select the option to automatically connect to this network in the future. You will not have internet access until you complete modem router setup.
4. Open a web browser and type <http://192.168.1.1> in the address bar.

5. In the pop-up window, enter "admin" in the Password field. Click Log in. The web-based setup page of your modem router will appear.

6. Make sure you are on the *Quick Start* tab. Click Begin to start the setup wizard.

Setup Wizard

1.

Let's get started

Setup will guide you through activating your modem router and customizing its settings.

I have read and accept the [License Terms for using this software](#)

I want to skip the Setup and configure the modem router manually

Next

Accept the License Terms and click **Next**.

2.

Activate your modem router

Activate this modem router with your internet service provider (ISP) by calling them or visiting their activation website. Get started by clicking on your ISP below.

Xfinity Spectrum Cox

Modem router information

MAC Address: 1c:ab:c0:ff:e6:00

Serial Number: 19710D98600048

Next

Choose an internet service provider, activate your modem router and click **Next**.

3.

Personalize your Wi-Fi

Choose your Wi-Fi name and password.

Wi-Fi Name

CG7500

Password

cg7500wlan

Back Next

Create a Wi-Fi name and password and click **Next**.

4.

Set your admin password

Choose an admin password to control access your router settings.

Admin Password

Back Next

Create an admin password and click **Next**.

5.

Summary

Take note of settings for future use.

Wi-Fi Settings

Wi-Fi Name : CG7500
Password : cg7500wlan

Router Administration Password

Password : admin

Back Save

Write down your settings somewhere you'll remember and click **Save**.

6.

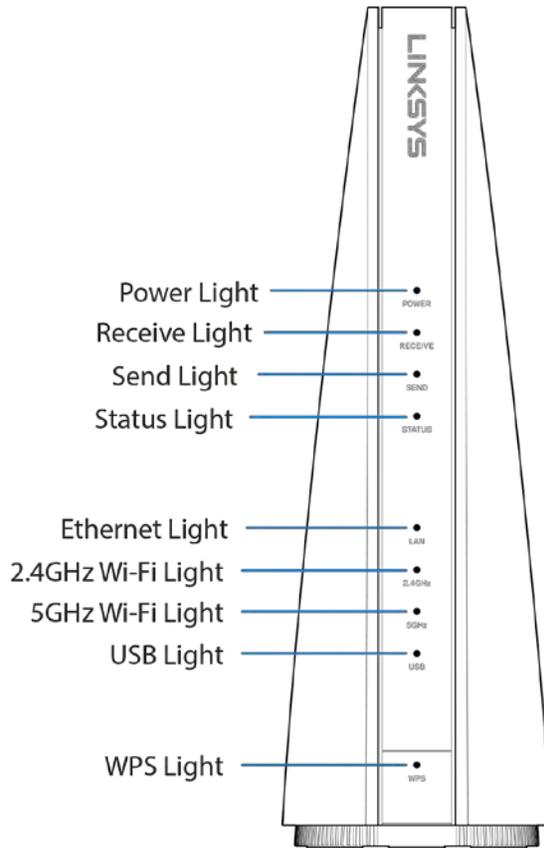

You're all finished

That's all there is to setup. Enjoy the internet!

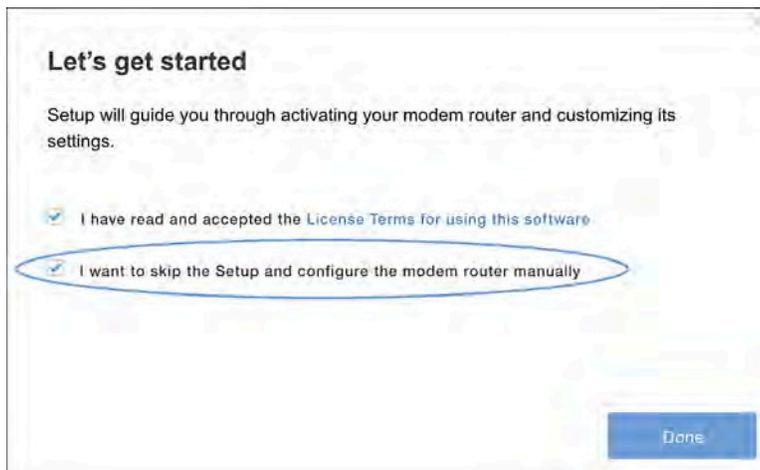

Done

Click **Done** and get online.

When your modem router is ready, the top four lights (power, receive, send, status) will be solid.

Advanced users can select "I want to skip the Setup and configure the router manually."

If you choose to manually set up the modem router, you will need to have the following information available for activation:

- Account number of your broadband subscription
- Phone number linked with your account
- Serial number of the modem router (on the back of the unit)
- MAC address of the modem router (on the back of the unit)

To activate:

Open a web browser from a computer that's connected directly to the modem router. This is where you will need the information above (account number of your broadband service, phone number and new modem router device identifiers).

Some service providers have additional setup steps that will automatically appear in the browser - if not, visit the appropriate link below. Follow the steps for your internet provider or call them if you are unable to get online.

Note—The modem router may reboot several times during this process and activation can take up to five minutes.

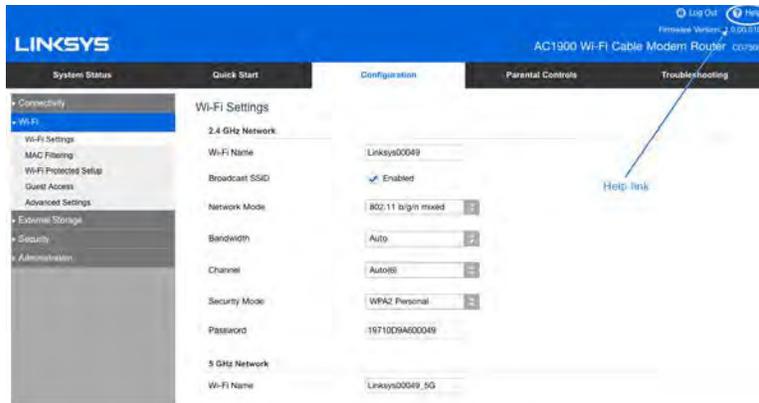

After activation, you should be able to connect to the internet wirelessly via your modem router or a wired connection between your computer and the modem router.

Browser-Based Utility

If you would like to change the modem router's advanced settings, use the browser-based utility. For more help with the utility, click the *Help* link in the upper-right corner of the screen or go to our support website www.linksys.com/support/cg7500.

How to access the browser-based utility

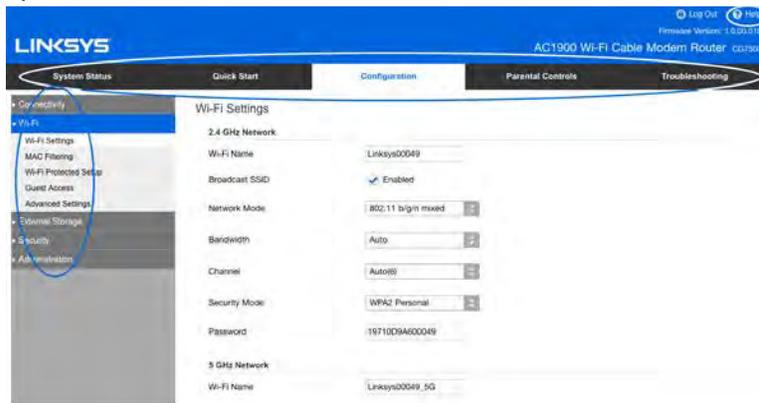

1. Launch the web browser on your computer, and enter the router's default Internet Protocol (IP) address, 192.168.1.1, in the address field. Press Enter.

2. In the *Password* field, enter the password created during setup. If you did not change the password, the default is "admin".
3. Click **Log in** to continue.

How to use the browser-based utility

Navigate the utility by using the tabs along the top of the screen and the corresponding specific menus down the left side of the screen.

If you change any settings on a screen, you must click the **Save** button at the bottom of the screen to apply your changes. Likewise, click **Cancel** to clear your changes.

Note—To learn more about any field, click the [Help](#) link in the upper-right corner of the screen.

System Status

Status

Status > Overview

The screenshot shows the Linksys System Status Overview page. The top navigation bar includes 'System Status', 'Quick Start', 'Configuration', 'Parental Controls', and 'Troubleshooting'. The main content area is divided into sections: 'UP TIME' with 'Internet Uptime' (001 days 02h:21m:12s) and 'Router Uptime' (001 days 02h:23m:50s); 'Wi-Fi' with '2.4 GHz' and '5 GHz' settings, each showing 'Wi-Fi Name' and 'Password'; and 'PARENTAL CONTROLS' with a table for managed devices.

Device	MAC Address	Managed Days

Overview tells you how long the router has been working since its last restart (Router Uptime), and how long it has been connected to the internet (Internet Uptime) in that period. This screen also shows your Wi-Fi name and password, and some details on any Wi-Fi devices managed by Parental Controls.

Status > System Information

The screenshot shows the Linksys System Information page. The top navigation bar is the same as the Overview page. The main content area is titled 'System' and contains a list of system information items:

System Information	
Hardware Version	0A
Software Version	1.0.0.010
Cable Modem Router Serial Number	1971C09A100049
HFC MAC Address	66:36:e0:1a:b4:e0
System Time	Tue, 31 Jan 2017 14:01:39
Time Zone	UTC-08:00 Pacific Time (PST & Canada)
WAN IP Address	192.168.66.40
WAN IP Address (IPv6)	
WAN Receiving	2.26M Bytes
WAN Sending	721.79K Bytes
Internet Uptime	001 days 02h:22m:53s
LAN IP Address	192.168.1.1/24

System Information page shows basic information such as the MAC address, software version, and the time that has elapsed since the last restart etc.

Status > Wi-Fi

The Wi-Fi screen provides detail about all Wi-Fi bands, including Guest Wi-Fi. Clicking the Wireless Clients button displays details about any connected Wi-Fi devices.

The screenshot shows the Linksys web interface for an AC1900 Wi-Fi Cable Modem Router. The navigation menu includes System Status, Quick Start, Configuration, Parental Controls, and Troubleshooting. The main content area is titled 'Wi-Fi Status' and contains the following information:

- Wi-Fi Status (2.4 GHz):** Enabled
- Network Mode (2.4 GHz):** 802.11 b/g/n Mixed
- Channel (2.4 GHz):** Auto(1)
- Wi-Fi Status (5 GHz):** Enabled
- Network Mode (5 GHz):** 802.11 a/n/ac Mixed
- Channel (5 GHz):** Auto(15)

Wi-Fi Overview:

Wi-Fi Name:	Status:	Password:	Security Mode:
Linksys0049	Enabled	19710D9A602049	WPA2 Personal
Linksys0048_5G	Enabled	19710D9A602048	WPA2 Personal

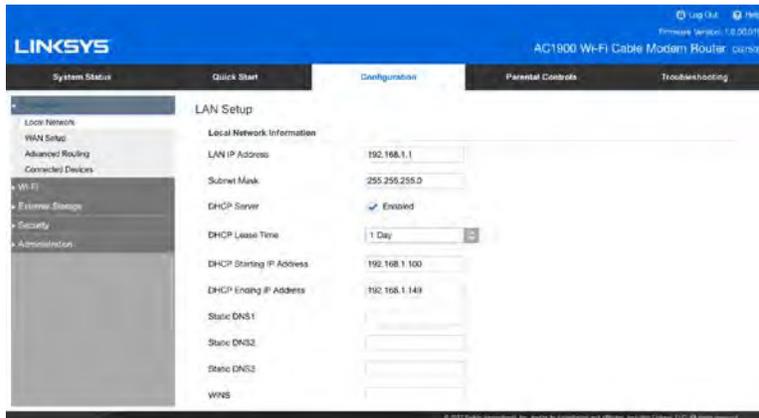

Guest SSID Overview

© 2017 Linksys. All rights reserved. See [https://www.linksys.com](#) for details. Product number: E22-001-00000000

Configuration

Connectivity

Connectivity > Local Network

Your router ships with the most common settings, and several settings are configured during setup. You may never have to change these settings.

LAN IP Address

The router's IP address on your Wi-Fi. If you change this address, you'll have to reconnect your devices to your router.

Subnet Mask

The router's subnet mask on your Wi-Fi. It is used to divide a network into subnets so information can be routed correctly to computers and devices.

DHCP Server

DHCP (Dynamic Host Configuration Protocol) is enabled by default. DHCP assigns IP addresses as needed to devices connected to your Wi-Fi.

DHCP Starting Address

The value that the DHCP server starts with when issuing IP addresses.

DHCP Ending Address

The value that the DHCP server ends with when issuing IP addresses.

DHCP Lease Time

The amount of time a Wi-Fi user is allowed connection to the router with her current IP address. When the time has expired, the user will be automatically assigned a new IP address, or the lease will be renewed.

Static DNS 1-3

Domain Name System (DNS) is how the internet translates a domain or website name into an internet address, or URL, that you can access. Your ISP will provide at least one DNS server IP address. You can enter up to three.

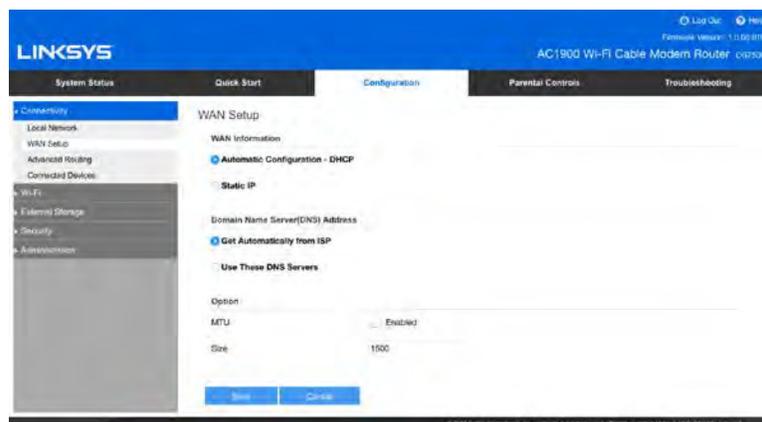

WINS

Windows Internet Naming Services manages each computer's interaction with the internet. If you use WINS a server, enter the server's IP address. Otherwise, leave it blank.

DHCP Reservations

Click to add or change the DHCP reservations used on your Wi-Fi. DHCP reservations allow you to assign a unique, fixed IP address to a specific device on your Wi-Fi. This is helpful when managing devices such as print servers, cameras, printers or game consoles. A fixed IP address is also recommended if you want to use port forwarding for devices that need to receive inbound data from the internet. To assign an IP address and MAC address to a device, click **Add** and then enter the device name, IP address, and MAC address. When finished, click **Apply**.

Connectivity > WAN Setup

WAN Information

Select your internet connection type. If you don't know, call your ISP.

Automatic Configuration - DHCP—Select if your ISP assigns IP addresses dynamically, meaning you get different IP addresses each time you start your computer.

Static IP—Select this if you use the same IP address each time you connect to the internet. Enter your internet address, subnet mask, default gateway, and DNS entries. You can get this information from your ISP.

Domain Name Server Address

Most users get a Domain Name Server address automatically from their ISP. If you subscribe to your own DNS server, select Use These DNS Servers and complete the field(s).

Option

This section is for advanced users.

Connectivity > Advanced Routing

The screenshot shows the Linksys configuration interface for an AC1900 Wi-Fi Cable Modem Router. The page is titled "Advanced Routing" and features a "Static Routing Table" with columns for Name, Destination IP Address, Subnet Mask, Default Gateway, Status, and Action. An "Add" button is visible below the table, along with "Save" and "Cancel" buttons. The left sidebar includes options like Local Network, WAN Setup, Advanced Routing, and Connected Devices. The top navigation bar includes System Status, Quick Start, Configuration, Parental Controls, and Troubleshooting. The top right corner shows "Log Out" and "Help" links, along with the firmware version "1.0.0.010".

Click **Add** to assign a specific IP address, subnet mask, and gateway address to a specific device. Click **Apply**.

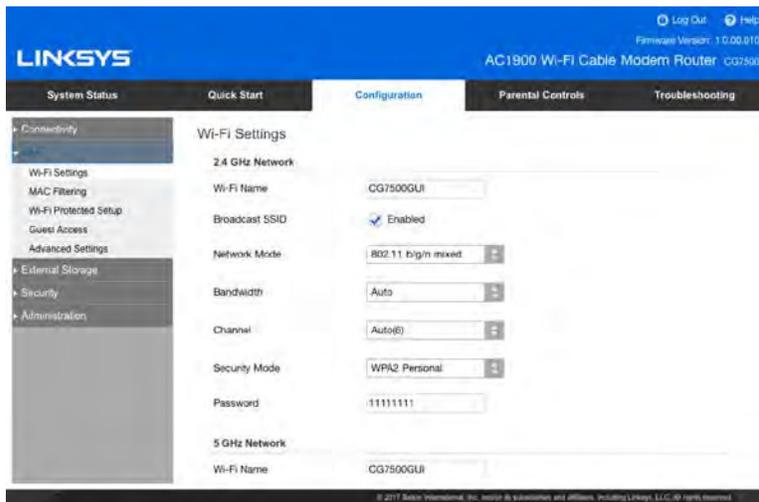

Connectivity > Connected Devices

The screenshot shows the Linksys configuration interface for an AC1900 Wi-Fi Cable Modem Router. The page is titled "Connected Devices" and displays a table with columns for Device, IP Address, MAC Address, Type, and Interface. A single device is listed: "ProductmentsMBP" with IP Address "192.168.1.101", MAC Address "00:25:00:4b:28:24", Type "DHCP-IP", and Interface "WIFI-5G". A "Refresh" button is located below the table. The left sidebar includes options like Local Network, WAN Setup, Advanced Routing, and Connected Devices. The top navigation bar includes System Status, Quick Start, Configuration, Parental Controls, and Troubleshooting. The top right corner shows "Log Out" and "Help" links, along with the firmware version "1.0.0.010".

Information about devices connected to your Wi-Fi.

Wi-Fi

Wi-Fi > Wi-Fi Settings

Wi-Fi Name

Personalize the Wi-Fi name that appears in the list of available networks.

Broadcast Wi-Fi Name

Allows Wi-Fi devices to detect your Wi-Fi name when they survey the local area for available Wi-Fi. Not broadcasting your Wi-Fi name does not improve your Wi-Fi security.

Network Mode

Select the standard your Wi-Fi supports.

Bandwidth

The *Auto* setting provides the best performance with Wireless-B, Wireless G, and Wireless N (2.4 GHz), Wireless-A, Wireless-N, Wireless-AC (5 GHz) devices. For a channel width of 20 MHz, select *20 MHz only*.

Channel

Select the channel for Wireless-B, Wireless-G, Wireless-N, Wireless-A, or Wireless-AC networking. If you're not sure which one to use, choose *Auto*.

Security Mode

Each device on your Wi-Fi must use the same security mode.

Password

Wi-Fi devices must enter this password, sometimes called a security key, to connect to your Wi-Fi.

Wi-Fi > MAC Filtering

The screenshot shows the Linksys web interface for an AC1900 Wi-Fi Cable Modem Router (CG7500). The navigation menu on the left includes System Status, Quick Start, Configuration (selected), Parental Controls, and Troubleshooting. Under Configuration, the Wi-Fi section is expanded, showing options like Wi-Fi Settings, MAC Filtering, Wi-Fi Protected Setup, Guest Access, and Advanced Settings. The main content area is titled 'Wi-Fi MAC Filters' and features a 'MAC Filters' toggle set to 'Enabled'. Below this is a 'Connected Devices' section with a 'Refresh' button and a table listing devices. The table has columns for Device, IP Address, MAC Address, Type, Interface, and Action. One device, 'ProductmentsMBP', is listed with IP 192.168.1.101 and MAC 00:25:00:4b:28:24. Below the table is a 'Managed Wi-Fi MAC Filters' section with 'Filter Options' set to 'Deny Access List' and an 'Add MAC Address' button. At the bottom are 'Save' and 'Cancel' buttons.

Device	IP Address	MAC Address	Type	Interface	Action
ProductmentsMBP	192.168.1.101	00:25:00:4b:28:24	DHCP-IP	WiFi-5G	Manage

Device	MAC Address	Action
Add MAC Address		

MAC filtering is a way to allow or deny access to your network by identifying specific MAC addresses. It is not a good substitute for a secure Wi-Fi password. If you enable MAC Filtering, Wi-Fi Protected Setup will be disabled automatically.

MAC Filters

Select *Enabled* to begin filtering Wi-Fi devices by MAC address.

Filter Options

Allow Access List limits access to devices whose MAC addresses are listed. All other devices will be denied. *Deny Access List* allows you to create a list of MAC addresses that cannot access your network. All devices not on that list will be able to connect to your network.

Add MAC Address

Add a MAC address to your list.

Wi-Fi > Wi-Fi Protected Setup

The screenshot shows the Linksys web interface for the AC1900 Wi-Fi Cable Modem Router (CG7500). The top navigation bar includes 'Log Out', 'Help', and 'Firmware Version: 1.0.00.010'. The main navigation menu has 'System Status', 'Quick Start', 'Configuration', 'Parental Controls', and 'Troubleshooting'. The left sidebar shows a tree view with 'Connectivity' expanded to 'Wi-Fi', which includes 'Wi-Fi Settings', 'MAC Filtering', 'Wi-Fi Protected Setup', 'Guest Access', and 'Advanced Settings'. Other categories include 'External Storage', 'Security', and 'Administration'. The main content area is titled 'Wi-Fi Protected Setup™' and features a 'WPS Enabled' checkbox checked to 'ON'. A warning box states: 'Wi-Fi Protected Setup cannot be used with WEP, WPA2 Enterprise or WPA/WPA2 Enterprise Mixed security mode or setting broadcast SSID or network mode (2.4G or 5G) disable or MAC Filtering. To use Wi-Fi Protected Setup, change your Wi-Fi security mode, broadcast SSID, network mode and/or disable MAC Filtering.' Below this is a 'Push Button' section with a button icon and text: 'If your client device has a Wi-Fi Protected Setup button, click or press that button and then click the button.' At the bottom is a 'Router PIN' input field. The footer contains the copyright notice: '© 2017 Belkin International, Inc. and/or its subsidiaries and affiliates, including Linksys, LLC. All rights reserved.'

Wi-Fi Protected Setup makes it easy to add devices to your Wi-Fi without having to enter a Wi-Fi name and password. To use Wi-Fi Protected Setup, the device you want to connect must support it.

WPS Enabled

If you uncheck this box, you can't use Wi-Fi Protected Setup to connect devices to your Wi-Fi, and the Wi-Fi Protected Setup push button on your router will also be disabled.

Push Button

Use this if your device has a Wi-Fi Protected Setup button or prompts you to press the Wi-Fi Protected Setup button on your router. Press or click the Wi-Fi Protected Setup button on the device you want to connect to Wi-Fi, and then click the button on this page.

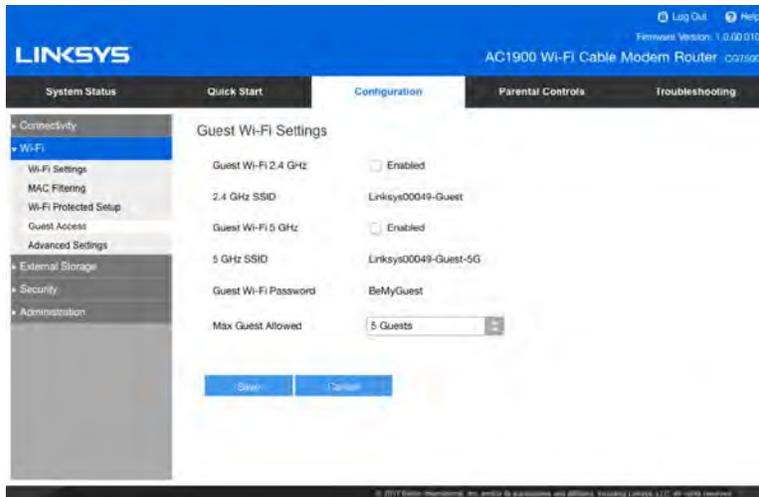

Router PIN

Use this if the device you're connecting asks for the router PIN (Personal Identification Number). The router PIN is also listed on the bottom of the modem router.

Device PIN

Use this if your device has a Wi-Fi Protected Setup PIN. Enter the PIN from the device into the PIN field and then click **Register**.

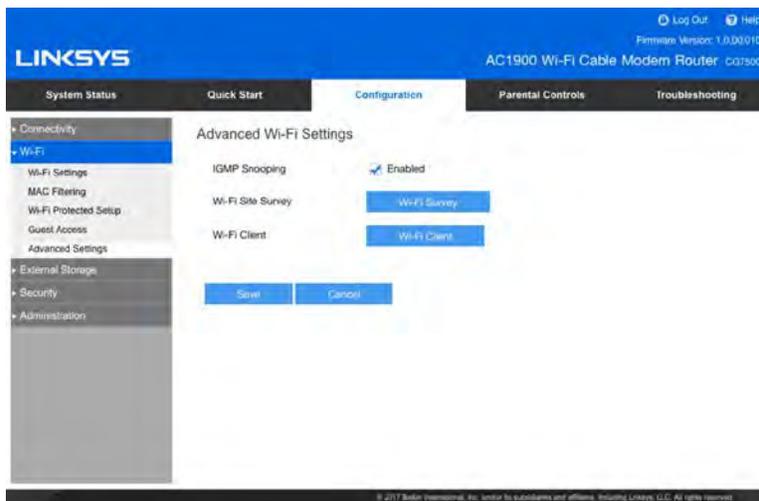

Wi-Fi > Guest Access

Guest Access is a way to share internet access. Guests can get online, but they can't see or access other connected devices. You can turn guest access on and off, give it a name and password, and set the number of guest devices allowed.

When you set up your router, a secure guest network was created automatically on the router's 2.4 GHz/5 GHz band. Guest access is available on these two bands. Be sure to keep this in mind if you're connecting other networking devices, such as an extender. It should be configured to use the 2.4 GHz/5 GHz band as well if you plan to use guest access.

Wi-Fi > Advanced Settings

IGMP Snooping is turned on by default. Only advanced users should turn off this setting.

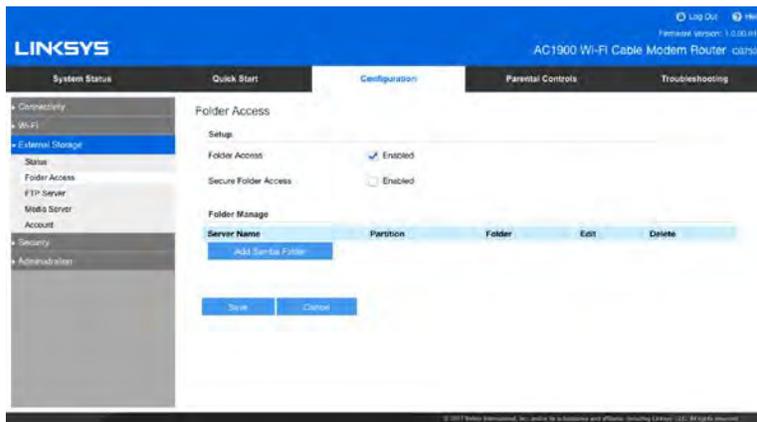

External Storage

External Storage > Status

Click **Eject** before physically disconnecting a USB disk from the modem router. This prevents the possible loss of data, which may occur if you remove the disk while it is transferring data.

External Storage > Folder Access

You can decide who has access to external storage connected by USB to your modem router. When Shared Status is disabled, anyone on your network can access all content on your storage device. If it is enabled, you can specify which users can see which content.

Click **Eject** before physically disconnecting a USB disk from the modem router. This prevents the possible loss of data, which may occur if you remove the disk while it is transferring data.

External Storage > FTP Server

You can access the folders on your storage device remotely from anywhere you have an internet connection using an FTP (File Transfer Protocol) server. You can access the content using a web browser or FTP software.

Server Name – Personalized the name of your FTP server.

FTP Server

Select to enable the FTP server, and make content available remotely.

Internet Access

Select to allow access to your storage device with a web browser.

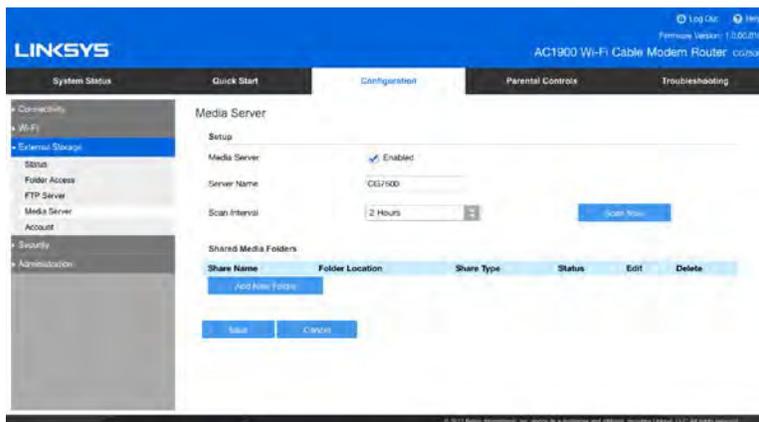

FTP Port

The default port, 21, will work for most users. Advanced users may change to a different port to serve their needs.

Add FTP Folder

To add a FTP folder, enter the server name and the information to use.

External Storage > Media Server

A media server lets you share across your network content on an attached external storage device. You can share media with devices that are UPnP AV (Audio and Video)-enabled or DLNA (Digital Living Network Alliance)-certified devices in your home. These

include digital media players, gaming consoles with a built-in media player, and digital picture frames.

You can specify which folders are used by the media server, add and disabled/delete folders, and specify how often the folders are scanned for new content.

Media Server

Select to share media.

Server Name

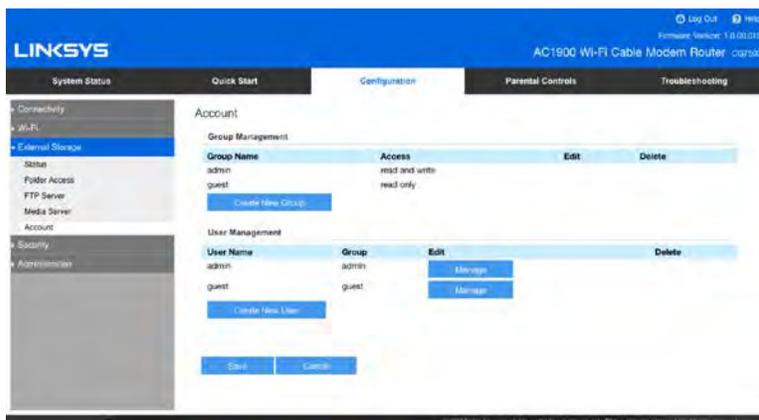

Personalize the display name of your UPnP media server.

Scan Interval

Specify how often the modem router scans folders on the external storage device for new content. Scanning can take several hours, especially the first time the device is scanned, or if you add a lot of new content. Subsequent scans should take less time. To scan the folders immediately, click **Scan Now**.

Click **Add New Folder** to add a new shared media folder. Select the folder on the attached external storage device that contains the content you want to share.

External Storage > Account

Two user accounts are preset for the modem router: admin and guest. The password for the admin user is the modem router's admin password. The password for the guest user is "guest".

Group Management

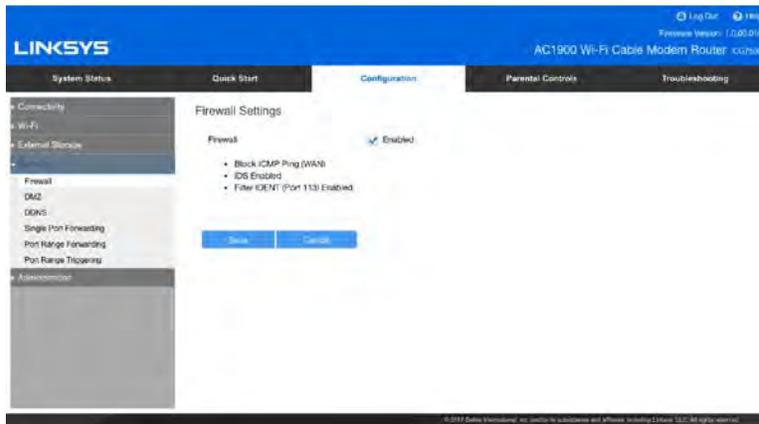

If you want to add to the default groups, click **Create New Group** and enter the name, description and the type of permission the group will have. Select *Read and Write* to allow the group to view, edit, or delete content. Select *Read Only* to limit the group to viewing content.

User Management

If you want to add a user to one of your groups, click **Create New User** and enter a user name, description, and password, and assign the user to a group.

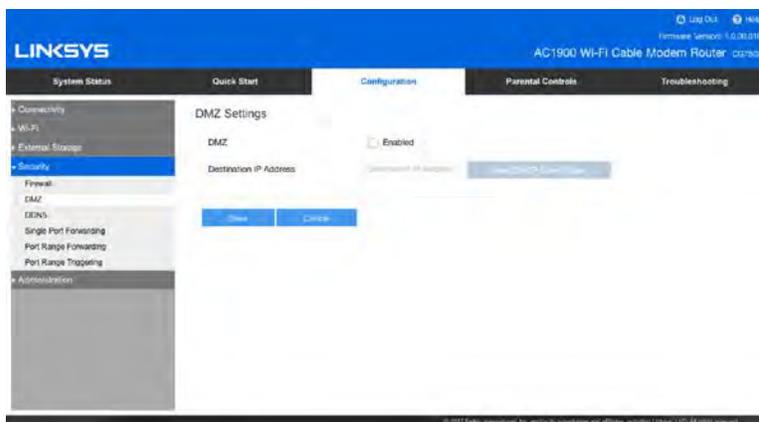

Security

Security > Firewall

The firewall, which protects your Wi-Fi from internet threats, is enabled by default.

Security > DMZ

The Demilitarized Zone (DMZ) feature can be used to expose a web server, mail server, or web camera to the internet so anyone can access it. This feature is not recommended because it presents significant security risks to the device that you designate for the DMZ. The device will not be protected by the built-in firewalls, internet filters, or modem router web filters.

With DMZ enabled, use the *Destination IP Address* to identify the device you wish to be in the DMZ. Click **View DHCP Client Table** to see a list of connected devices. Select the IP address of the desired device and it will automatically populate the *Destination IP Address* field.

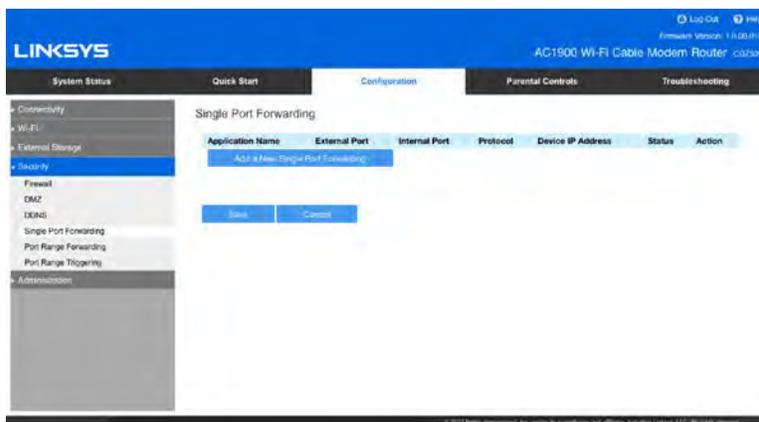

Security > DDNS

The DDNS feature lets you configure a domain name for your home network, which you can use to easily find your network on the internet. This is useful if you want to remotely access a USB drive or web camera over the internet.

Select your DDNS service and complete the fields with information provided to you by your DDNS provider.

Security > Single Port Forwarding

Single Port Forwarding directs inbound traffic from the internet on a specific port to a single device on your Wi-Fi. For example, forwarding inbound web requests, typically on port 80, to a web server. To forward to multiple ports, create additional entries to forward additional ports to the same IP address. Click **Add a New Single Port Forwarding**.

Application name

The application or device name using port forwarding. Refer to your device's documentation for recommendations if needed.

External Port

Enter the external port number.

Internal Port

Enter the internal port number.

Protocol

Select the protocol to use.

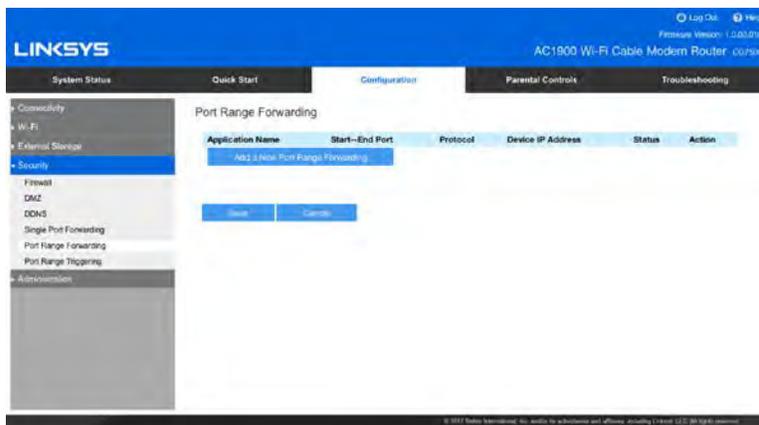

Device IP Address

Enter the IP address you have reserved for the computer you want to forward internet traffic to.

Status

Select to use the port forwarding. If you don't want to use port forwarding but want to keep the information in the table, unselect the checkbox.

Security > Port Range Forwarding

Port forwarding directs inbound traffic from the internet on range of ports to a specific device on your Wi-Fi. For example, some applications can use a range of ports so that if one port is busy, they can try another one. Click **Add a New Port Range Forwarding**.

Application name

The application or device name using port forwarding.

Start-End Port

The port number or range of ports used by the application or device for port forwarding. To specify a range of ports, separate the first and last port numbers with a dash, for example, 5800-5900.

Protocol

Select the protocol to use, typically TCP.

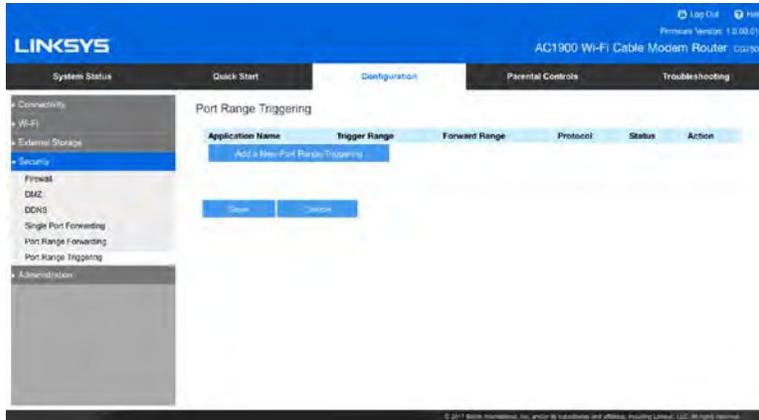

Device IP Address

Enter the last three digits of the IP address of the computer running the software that requires port forwarding.

Status

Select to use port range forwarding. If you don't want to use port forwarding but want to keep the information in the table, unselect the checkbox.

Security > Port Range Triggering

Port range triggering allows the modem router to watch outgoing data for specific port numbers. The cable modem remembers the IP address of the device that sends the data so returning data is routed back to the proper device. This is useful when using a USB or Bluetooth headset for online chat and gaming. Click Add a New Port Range Triggering.

Application name

The application or device using port triggering.

Trigger Port Range/Forward Port Range

The port number or range of ports used by the application or device for port triggering.

Status

Select to use port range triggering. If you don't want to use port range triggering for that entry, but want to keep the information in the table, unselect the checkbox.

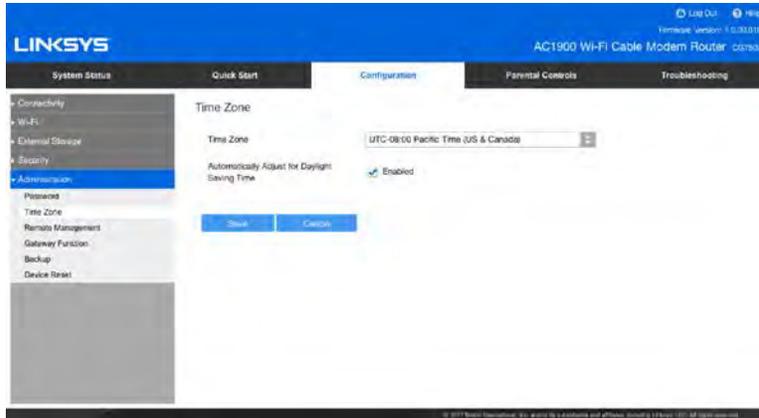

Administration

Administration > Password

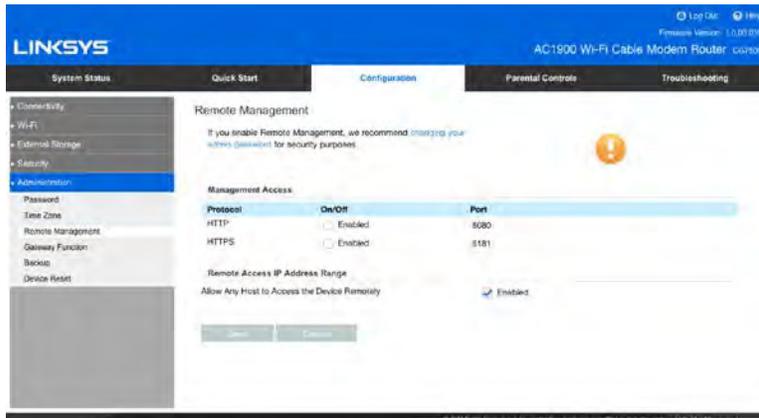

Allows you to change the modem router password. Use it to access modem router settings and features such as Guest Access and Parental Controls. To change the password, first enter the old password, then type a new password and confirm it. Click **Save**. Be sure to write down this password and keep it somewhere safe.

Administration > Time Zone

Set the current time zone for your area and adjust the time for daylight savings time changes.

Administration > Remote Management

Select a remote access protocol and identify a port to use when accessing your modem router settings when away from home and not connected to your Wi-Fi.

Protocol

Select the protocol for remote access.

On/Off

Enabled/Disabled the remote access.

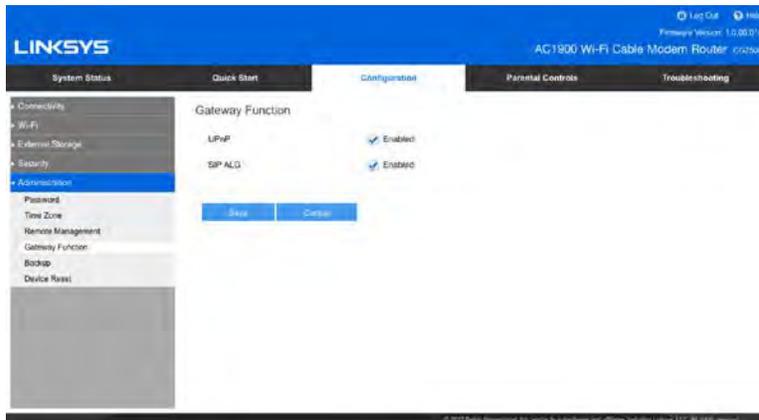

Port

Enter the port number that will be open to remote access.

Allow Any Host to Access the Device Remotely

Select to allow remote access to the modem router from any external IP address. Deselect to specify an external IP address or range of IP addresses allowed to remotely access your modem router.

Administration > Gateway Function

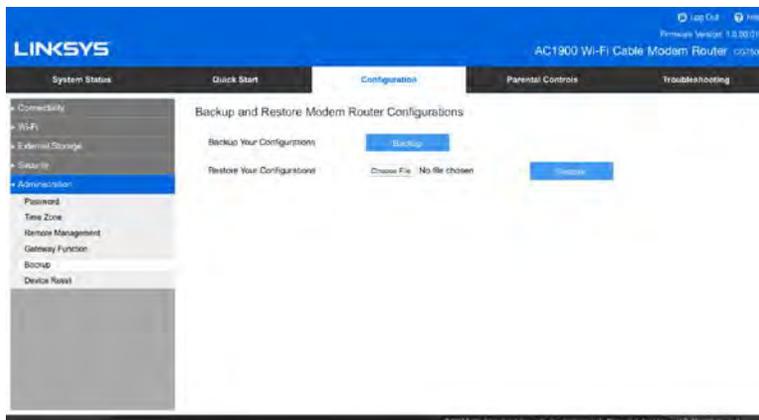

UPnP (Universal Plug and Play) allows devices connected to Wi-Fi to discover each other and automatically create working configurations. Examples of UPnP-capable devices include web cameras, online gaming applications, and VoIP devices. UPnP is enabled by default.

Select to allow users to change router settings or disable your local internet connection while using UPnP.

SIP ALG (Session Initiation Protocol Application Layer Gateway) is a feature that allows certain VOIP service providers to get through your modem router's firewall. Select to use this feature.

Administration > Backup

Backup Your Configurations

Back up your modem router's settings to a file on your computer. You can use the file later if you need to restore the settings. To create a backup file of the current settings.

Restore Your Configurations

Click **Choose File** and navigate to the backup file you want to restore. Click **Restore**.

Administration > Device Reset

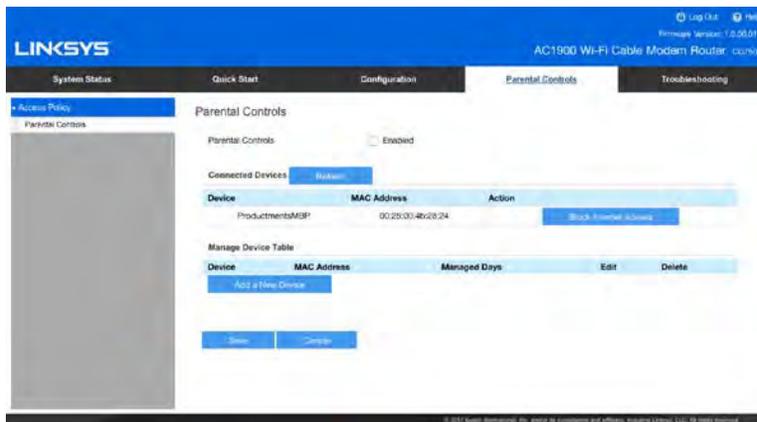

Restart the Modem Router

Restarts your modem router by turning it off and then on again. All devices connected to your modem router will be disconnected. They will reconnect automatically when the restart finishes.

Reset to Factory Default Settings

Resets all modem router settings to how they were before you set it up. A reset changes the modem router name, password, security settings, parental control settings, and all other settings you have changed. After a reset, you can customize your settings again.

Parental Controls

Use Parental Controls to manage internet use by blocking access per device. You also can block specific sites per device. Once you turn on Parental Controls, click **Block Internet Access** next to a device in the *Connected Devices* table. Select *Never*, *Always* or *Specific Times*. If you choose *Specific Times*, you will have to select the days and times you want to block the internet on that device.

Click *Add* next to *Block Specific Sites* and Choose *Block Sites* and enter the URL of the sites you want to block from that device. Click **Apply**. Click *Add* again to block another site.

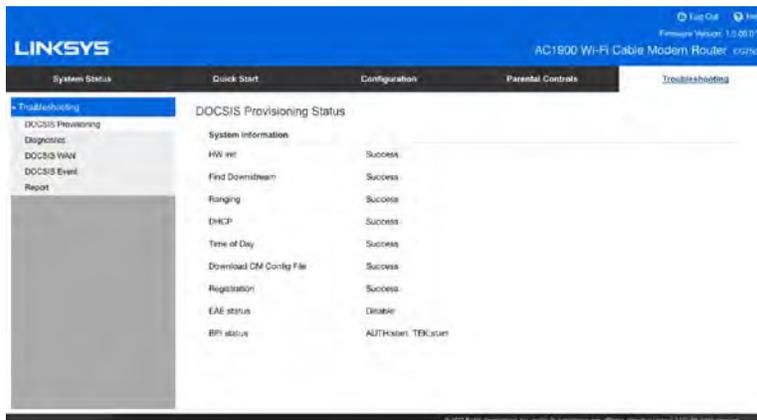

Use the *Manage Device Table* to change parental control settings. Click **Manage** to make changes and **Delete** to undo all parental controls on a device.

Click **Add a New Device** to assign parental controls to a new device on your Wi-Fi. Enter a device name and the device's MAC address, then choose when to block the internet to that device.

Click **Save** before leaving the page.

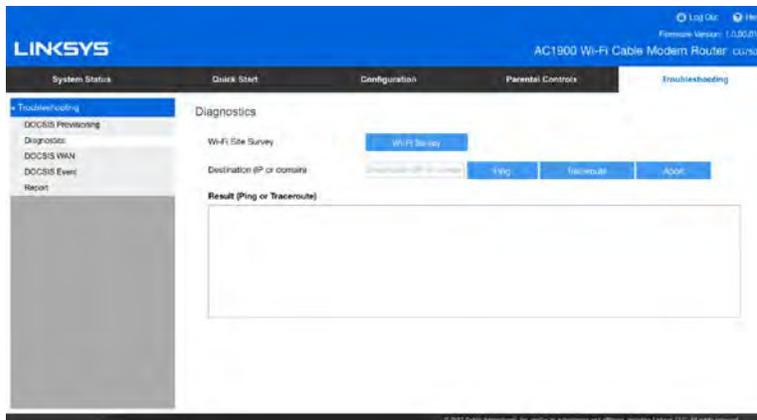

Troubleshooting

DOCSIS Provisioning

This screen provides details on the provisioning of your modem router.

Diagnostics

Use diagnostics to aid in troubleshooting your modem router's connectivity.

Ping

Check whether a destination IP/URL is available.

Traceroute

Trace the routing path to the destination IP/URL.

Abort

Stop ping test or traceroute test.

Specifications

Linksys CG7500

Model Name	AC1900 24x8 Cable Modem Router
Model Number	CG7500
Switch Port Speed	10/100/1000 Mbps (Gigabit Ethernet)
Radio Frequency	2.4 GHz and 5 GHz
# of Antennas	6 internal
Ports	Cable, Power, USB 2.0, Ethernet (1-4)
Buttons	Reset
Lights	Ethernet, WPS, Wi-Fi, Internet (Send/Receive/Status), Power, Ethernet
UPnP	Supported
Security Features	WEP, WPA-Enterprise, WPA2-Personal
Security Key Bits	Up to 128-bit encryption
Storage File System Support	FAT, NTFS, and HFS+

Environmental

Dimensions	30 mm x 185mm x 240 mm
Unit Weight	.924 kg (2.04 pounds)
Power	12V, 3A
Certifications	FCC, UL, Wi-Fi (IEEE 802 .11ac/a/b/g/n), RoHS
Operating Temperature	0 to 40°C (32 to 104°F)
Storage Temperature	-20 to 60°C, (-4 to 140°F)
Operating Humidity	10% to 80% relative humidity, non-condensing
Storage Humidity	5% to 90% non-condensing

Specifications are subject to change without notice.

NOTES

For regulatory, warranty, and safety information, see the CD that came with your modem router or go to Linksys.com/support.

Maximum performance derived from IEEE Standard 802 .11 specifications. Actual performance can vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends on many factors, conditions and variables, including distance from the access point, volume of network traffic, building materials and construction, operating system used, mix of wireless products used, interference and other adverse conditions.

Visit linksys.com/support/ for award-winning technical support.

QIG - 110 gsm COATE PAPER

177.8
[7]

FCC Statement
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This product has been tested and complies with the specifications for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used according to the instructions, may cause harmful interference to radio communications. There is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be identified by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and device.
- Connect the equipment to an outlet other than the receiver's.
- Consult a dealer or an experienced radio/TV technician for assistance.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Musico Regulatory Statement
La consiguiente exposición a este equipo es conforme a las siguientes condiciones. (1) Es posible que este equipo o dispositivo no cause interferencia perjudicial y (2) este equipo o dispositivo debe aceptar cualquier interferencia, incluidos los que puedan causar o ser causados por dispositivos.

FCC Radiation Exposure Statement
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 35 cm between the radiator and your body.

Wireless Disclaimer
The maximum performance for wireless is derived from IEEE Standard 802.11 specifications. Actual performance may vary, including lower wireless network capacity, data throughput rate, range, coverage, Performance depends on many factors, conditions and variables, including distance from the access point, volume of network traffic, building materials and construction, operating system used, wireless products used, interference and other adverse conditions.

For product available in the USA/Canada market, only channel 1-11 can be selected. Operation of other channels is not supported.

Restrictions in the GHz Band
The device for the band 5.150-5.250 MHz is only for indoor usage to reduce potential for harmful interference to co-channel mobile satellite systems.

UL statement
This equipment system should be grounded (earthed) in accordance with ANSI/NFPA 70: National Electrical Code (NEC), in particular Section 820.93, Grounding of Outer Conductive Shield of a Cables Cable.

Noise Notices
WARNING: Do not use this product near water, for example, in a wet bathroom or near a swimming pool.
WARNING: Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.
WARNING: The power adaptor is not an electrical s' disconnection device. The power switch will be located nearby in the equipment and is active when the power is on.

WARRANTY AND SUPPORT INFORMATION
IMPORTANT!
PLEASE RETAIN PROOF OF PURCHASE AND PRODUCT WARRANTY INFORMATION

8820-02559 Rev. C10

LIMITED WARRANTY (UNITED STATES AND CANADA)

This warranty is provided to you by Belkin International, Inc. or one of its subsidiaries or affiliates ("Belkin").

IMPORTANT NOTICE REGARDING YOUR CONSUMER RIGHTS

The benefits we give in this manufacturer's warranty are **additional** to any rights and remedies that you may have under local consumer protection laws. Nothing in this warranty limits or affects your legal rights.

This manufacturer's warranty is governed by the laws of the country in which you purchased your Belkin, Linksys or WeMo product. In many countries, consumers have rights under local consumer laws. These consumer rights may differ between countries, states and provinces, and often cannot be excluded. Your local consumer rights organization can advise you on your rights.

This manufacturer's warranty is not intended to:

- change or exclude any rights under consumer law that cannot be lawfully excluded or excluded; or
- limit or exclude any rights you have against the consumer who sold the Belkin, Linksys or WeMo product to you, if that person has breached their sales contract with you.

WHAT DOES THIS WARRANTY COVER?

Belkin warrants that the product hardware and any software media (i.e., media on which the product software is provided) will be free from defects in materials and workmanship under normal use during the Warranty Period described below. This means that the product won't be defective, and that it will work as well as advertised during the relevant period.

This warranty does not apply to products purchased from a source other than Belkin or a Belkin Authorized Reseller.

How long is the product warranty?

Belkin warrants that the hardware in this Belkin, Linksys or WeMo product, and any associated software media, will be free from defects in materials and workmanship under normal use during the Warranty Period. The Warranty Period begins on the date the product was purchased by the original end user purchaser and lasts for the set out in the table below.

Product Type	Warranty Period
New products	30 months
Replacement products	90 days
Required or replacement products	The longer of the original Warranty Period or 30 days
Software media (if provided with the product)	90 days

A claim under this warranty is only eligible if it is made within the Warranty Period.

What isn't covered?

Belkin does not give any warranty:

- in relation to software or services, provided by Belkin or any third party, included in or with the product;
- that the product, software or services will always operate without error or error-free;
- that the product, software or services, or any equipment, network or network on which the product, software or services are used, will always be available, available, or maintained in accordance with Belkin's instructions;
- that a third party's product needs will always be available.

Note: Although Belkin does not make these promises in this warranty, you may have additional rights under consumer laws in your area.

Will this warranty always apply?

This warranty does not apply:

- if the product has been tampered with or the assembly seal has been removed or damaged;
- if the product has been altered or modified by someone other than Belkin;
- if the warranty claim was made fraudulently or by misrepresentation;
- if the product was not installed, operated, repaired, or maintained in accordance with Belkin's instructions;
- if the product has been subjected to abnormal physical or electrical stress, misuse, negligence, or accident;
- if damage to the product is cosmetic, including scratches and dents, or defects caused by normal wear and tear or normal usage of the product.

- the serial number on the product has been altered, defaced, or removed; or
- the product was supplied or licensed to beta, evaluation, testing or demonstration purposes, and you didn't buy or license the product.

Note: Although this warranty doesn't apply in these situations, you may have additional rights under consumer laws.

How can Belkin make things right?

If you make an eligible claim under this warranty, Belkin will, at its election:

- repair the product with new or refurbished parts, or pay the reasonable costs of repairing the product;
- replace the product with a reasonably available equivalent new or refurbished Belkin, Linksys or WeMo product; or
- refund you the purchase price of the product, minus any rebates and discounts.

Any repaired or replacement products are warranted for the remainder of the original Warranty Period or 30 days, whichever is longer. All products and parts that are replaced become the property of Belkin.

Note: The rights and remedies outlined above are the only rights and remedies available under this warranty. However, you may have additional rights under consumer laws.

GENERAL EXCLUSIONS AND LIMITATIONS OF LIABILITY

IN THESE JURISDICTIONS WHERE IT CAN LAWFULLY DO SO, AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS OR THEIR RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES, LICENSORS AND ASSISES IS/ARE EXCLUDED FROM LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES WHATSOEVER INCLUDING BUT NOT LIMITED TO DAMAGES FOR LOSS OF PROFITS OR REVENUE, FOR BUSINESS INTERRUPTION, FOR PERSONAL INJURY, FOR LOSS OF DATA, FOR LOSS OF ABILITY TO USE, ANY PARTS, PRODUCTS OR SERVICES, FOR FAILURE TO MEET ANY DUTY OF GOOD FAITH OR OF REASONABLE CARE, FOR NEGLIGENCE, AND FOR ANY OTHER SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF THE THEORY OF LIABILITY, INCLUDING BUT NOT LIMITED TO THE THEORY OF LIABILITY, ARISING FROM CONTRACT, TORT, OR OTHERWISE ARISING OUT OF OR IN CONNECTION WITH THE PRODUCT, EVEN IF BELKIN OR SUCH OTHER ENTITIES HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS OR THEIR RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES, LICENSORS AND ASSISES IS/ARE EXCLUDED FROM LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, INCLUDING BUT NOT LIMITED TO DAMAGES FOR LOSS OF PROFITS OR REVENUE, FOR BUSINESS INTERRUPTION, FOR PERSONAL INJURY, FOR LOSS OF DATA, FOR LOSS OF ABILITY TO USE, ANY PARTS, PRODUCTS OR SERVICES, FOR FAILURE TO MEET ANY DUTY OF GOOD FAITH OR OF REASONABLE CARE, FOR NEGLIGENCE, AND FOR ANY OTHER SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF THE THEORY OF LIABILITY, INCLUDING BUT NOT LIMITED TO THE THEORY OF LIABILITY, ARISING FROM CONTRACT, TORT, OR OTHERWISE ARISING OUT OF OR IN CONNECTION WITH THE PRODUCT, EVEN IF BELKIN OR SUCH OTHER ENTITIES HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS TO YOU FOR ALL DAMAGES EXCEED THE PRICE YOU PAID FOR THE PRODUCT. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF ANY WARRANTY OR REMEDY PROVIDED BY APPLICABLE LAW OR OTHERWISE PROVIDES FOR A REMEDY THAT EXCEEDS THE PRICE YOU PAID FOR THE PRODUCT.

THE ABOVE LIMITATIONS AND EXCLUSIONS DO NOT AFFECT ANY RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER APPLICABLE LAW. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF ANY WARRANTY OR REMEDY PROVIDED BY APPLICABLE LAW OR OTHERWISE PROVIDES FOR A REMEDY THAT EXCEEDS THE PRICE YOU PAID FOR THE PRODUCT.

THE ABOVE LIMITATIONS AND EXCLUSIONS DO NOT AFFECT ANY RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER APPLICABLE LAW. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF ANY WARRANTY OR REMEDY PROVIDED BY APPLICABLE LAW OR OTHERWISE PROVIDES FOR A REMEDY THAT EXCEEDS THE PRICE YOU PAID FOR THE PRODUCT.

THE ABOVE LIMITATIONS AND EXCLUSIONS DO NOT AFFECT ANY RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER APPLICABLE LAW. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF ANY WARRANTY OR REMEDY PROVIDED BY APPLICABLE LAW OR OTHERWISE PROVIDES FOR A REMEDY THAT EXCEEDS THE PRICE YOU PAID FOR THE PRODUCT.

THE ABOVE LIMITATIONS AND EXCLUSIONS DO NOT AFFECT ANY RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER APPLICABLE LAW. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF ANY WARRANTY OR REMEDY PROVIDED BY APPLICABLE LAW OR OTHERWISE PROVIDES FOR A REMEDY THAT EXCEEDS THE PRICE YOU PAID FOR THE PRODUCT.

THE ABOVE LIMITATIONS AND EXCLUSIONS DO NOT AFFECT ANY RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER APPLICABLE LAW. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF ANY WARRANTY OR REMEDY PROVIDED BY APPLICABLE LAW OR OTHERWISE PROVIDES FOR A REMEDY THAT EXCEEDS THE PRICE YOU PAID FOR THE PRODUCT.

THE ABOVE LIMITATIONS AND EXCLUSIONS DO NOT AFFECT ANY RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER APPLICABLE LAW. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF ANY WARRANTY OR REMEDY PROVIDED BY APPLICABLE LAW OR OTHERWISE PROVIDES FOR A REMEDY THAT EXCEEDS THE PRICE YOU PAID FOR THE PRODUCT.

THE ABOVE LIMITATIONS AND EXCLUSIONS DO NOT AFFECT ANY RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER APPLICABLE LAW. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF ANY WARRANTY OR REMEDY PROVIDED BY APPLICABLE LAW OR OTHERWISE PROVIDES FOR A REMEDY THAT EXCEEDS THE PRICE YOU PAID FOR THE PRODUCT.

THE ABOVE LIMITATIONS AND EXCLUSIONS DO NOT AFFECT ANY RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER APPLICABLE LAW. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM. THE FOREGOING LIMITATIONS WILL APPLY EVEN IF ANY WARRANTY OR REMEDY PROVIDED BY APPLICABLE LAW OR OTHERWISE PROVIDES FOR A REMEDY THAT EXCEEDS THE PRICE YOU PAID FOR THE PRODUCT.

THE ABOVE LIMITATIONS AND EXCLUSIONS DO NOT AFFECT ANY RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER APPLICABLE LAW. BELKIN, ITS AFFILIATES, ASSOCIATED DEALERS, AGENTS OR SUPPLIERS WILL NOT BE INCREASED BY THE EXISTENCE OF MORE THAN ONE REMEDY OR CLAIM.
