

Woobm-USB

The Woobm is a USB device meant to ease wireless access to RouterBOARD devices that have a USB port, but do not have wireless interfaces. The device can operate in 2GHz 802.11b/g/n wireless mode, both as a slave and as a MASTER point, which can be protected with a WPA wireless password.

Powering

The device accepts powering from the USB port of the RouterBOARD device.

Setup

1. Plug the Woobm into the USB port of a RouterBOARD device.
2. Set your computer IP configuration to automatic (DHCP).
3. From your PC or smartphone, connect to the wireless network name “WoobmAP”.
4. Once connected to the wireless network, open <http://192.168.4.1> in your web browser, since there is no password by default, you will be logged in automatically.

Configuration

The Woobm runs a special operating system where you can configure its basic functionality, the configuration is accessible through a web interface. To connect to the RouterBOARD device, the following methods are available:

1. Click on “Terminal” in the Woobm web configuration interface.
2. Open a Telnet connection to the Woobm device from your computer, you will be directly connected to the RouterBOARD device.

For more detailed instructions, please see full Woobm software documentation on <http://mt.lv/help>

Buttons and jumpers

The Woobm has one button, which has the following functions:

- Reset: remove the device from the USB port, press the button, plug in the device, while holding the button. Release the button when the LED light starts flashing red to restore factory defaults.
- WPS: press the button once, while it is working. This will enable WPS for 5 seconds.

Operating system support

The device supports Woobm software only. It can be updated, by uploading a newer .BIN file through the web configuration page.

Federal Communication Commission Interference Statement

FCC ID: TV7WBM

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This device and its antenna must not be co-located or operated in conjunction with any other antenna or transmitter.

This device is acting as slave/MASTER and operating in the 2.4 GHz (2412 ~2462 MHz) band.

Industry Canada

IC: 7442A-WBM

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
