

How to Change your wireless network name & password on the Q1000 Qwest Wireless N VDSL Modem Router

Q1000 Qwest Wireless N VDSL Modem Router from Actiontec

We'll review the easy steps on how to change your wireless network name and/or password for your Q1000 Qwest Wireless N VDSL Modem Router, manufactured by Actiontec Electronics, Inc.

The instructions below are for the Q1000 Qwest Wireless N VDSL Modem Router with QAQ01-31.00L.29 firmware.

Things You'll Need

- Q1000 Qwest Wireless N VDSL Modem Router
- Computer connected to the Modem

Step 1

On any computer that is connected to the Internet, type `http://192.168.0.1` in the web browser window and then press Enter.

Step 2

Click Wireless Setup.

Step 3

The Basic Settings screen appears. To change the name of your wireless network, go to "#2. Change the network name (optional)". Enter the name or code that you want. Click Apply.

Step 4

To change the wireless password or WPA Key, select WPA or WPA2 from the menu on the left.

Step 5

Go to "5. Select a security key type or select Enterprise Network to use 802.1x". Then click the button next to "Use Custom Key/Passphrase."

Step 6

Now enter a new password or passphrase.

Step 7

Write down your new wireless network name and password. Then click Apply.

Congratulations! You have successfully changed the wireless name and/or wireless password for your Q1000 Qwest Wireless N VDSL Modem Router.
