## Pro Gaming Features

Your router comes with the following pro gaming features. For more information, visit [www.netgear.com/support/product/XR500](http://www.netgear.com/support/product/XR500).

**Gaming dashboard.** Get an overview of your router settings.

**Geo-filter.** Reduce lag by setting a distance limit between you and game servers or other players.

**Quality of Service (QoS).** Set bandwidth allocation for each device and application connected to your router.

**Gaming VPN client support.** Protect your network identity and prevent DDoS attacks.

**Network monitor.** Check bandwidth-hogging devices and identify what causes lag.

## 1 Set Up the Hardware

- Remove the antenna caps from the antenna posts on the back of the router.
- Attach and position the antennas.

For the best WiFi performance, position the antennas as shown.

- Unplug your modem, remove and reinsert the backup battery if it uses one, and then plug the modem back in.
- Use the Ethernet cable to connect the modem to the yellow Internet port on the router.

**Note:** If your Internet connection does not require a modem, connect your main Ethernet cable to the yellow Internet port on the router.

- Connect the router to a power source.  
The router's Power LED  lights solid white when the router is ready.

## 2 Set Up the Network

- Make sure that the LED on the **WiFi On/Off** button is lit.
- Look for the label on your router that displays your router's WiFi network name and password.

**Note:** The location of the label might vary.

- Use the WiFi network name and password on the label to connect your WiFi-enabled computer or mobile device to your router's WiFi network.
- Launch a web browser.  
The installation assistant automatically displays.
- If the installation assistant does not display, visit [www.routerlogin.net](http://www.routerlogin.net).

If a login window displays, enter **admin** for the admin user name and **password** for the admin password.

- Follow the prompts that display to install your router and connect to the Internet.  
The router's Internet LED lights white when the router is connected to the Internet.
