# ALLNET®

Easy Start Guide

ALL0236R
Portable 300Mbps Wireless-N Repeater

This Easy Start Guide will help you setup the Wireless Repeater and connect to your existing wireless router/AP. Before you continue with installation, please make sure that you have the wireless settings of your existing wireless router/AP and that it is connected to the Internet.

Configuring the Device

Before moving ahead to setup your wireless repeater, it is often a good idea to identify the areas where you have good wireless reception and weak or no wireless signal at all. Based from this assessment you may place the wireless repeater in between a location where you have good wireless reception and where you have poor wireless coverage.

Desktop PC
WIRELESS-N 300Mbps ALL0236R
Notebook
Mobile Phone
Notebook
Broadband Router

NOTE: Placement of the Wireless Repeater is crucial to get the best possible results for extending your existing wireless signal.
It is ideal for the wireless repeater to be placed in a location where it can receive good wireless signal from the wireless router/AP so as to avoid disconnection and packet loss.
Setup Your Device

Setting up the device is easy. Simply follow the steps below to connect the device to your existing wireless router/AP. Please note that the main router/AP and Wireless Repeater must be on the same wireless channel.

1. Connect the ALL0236R to a power outlet.

2. Connect a PC/laptop to the Wireless Repeater.

For WIRED Connection
Plug an Ethernet cable to the Ethernet port at the base portion of the device.

For WIRELESS Connection
You can find the default SSID and wireless security information from the sticker located at the back of the device.

3. Once a connection to the device is established, your PC/laptop will receive an IP address and you can start the configuration using the web graphical user interface.

4. To access the web GUI, Open your web browser

5. Type 10.0.10.254 on the address bar

6. Input admin for both username and password fields and click on the OK button

7. On the top pane, click on Quick Setup

8. Click the Site Survey button to view the available wireless networks in the area

9. Click the connect button located on the right side of the wireless network you want to connect to

10. Key-in the wireless network key/passphrase and Click the Apply button to commit the changes
