Package Contents

- All-in-One Mobile Companion
- Ethernet Cable

If any of the above items are missing, please contact your reseller.

LEDs

- Power LED** - A solid green light indicates a proper connection to the power supply. The light will be solid red during boot up and during a factory reset.

DIR-505

Please refer to the user manual for further information regarding SharePort Mobile App. Please download the user manual from <http://www.dlink.com/support/>

QRS Mobile App for iOS Device

Scan this QR code using your iOS mobile device. You will be directed to the App store to download the QRS Mobile App so that you may begin the installation process.

SharePort Mobile App for iOS Device

Scan this QR code using your iOS mobile device to download the App and begin file sharing.

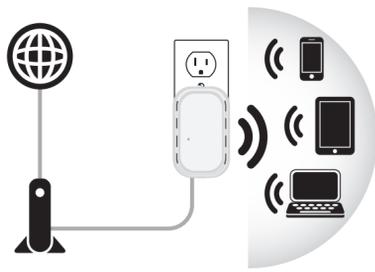

Requirements: Compatible with iPhone, iPod touch and iPad. Requires iOS 4.3 or later.

Note: The SharePort Mobile App only works on Router and Wi-Fi Hotspot Mode.

Start Here - Select The Mode

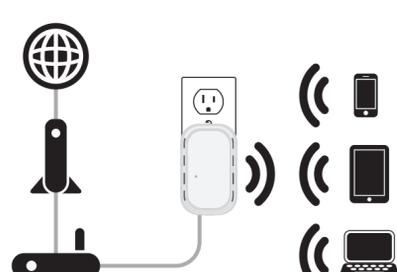

Router Mode

This feature behaves as a router in areas where you cannot take your home router so that you may wirelessly connect to the internet.

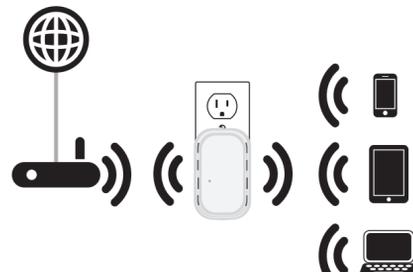

AP Mode

Use Access Point (AP) mode if you want to connect wireless clients (such as laptops, tablets, smartphones, and media players) to your wired network (via router, switch, or PowerLine devices).

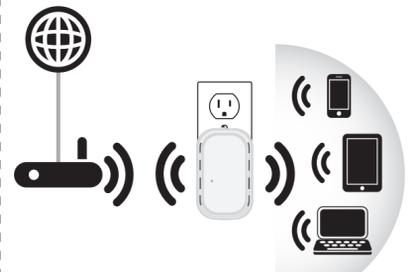

Repeater Mode

This feature extends your wireless coverage allowing you to share your wireless signal with all your portable devices such as your mobile device or laptop.

Wi-Fi Hotspot Mode

This feature allows you to have your own private network from anywhere that you may travel.

QRS Mobile Setup For Router Mode (iPhone and iPad Only)

-
-
-
-
-
-
-

Scan the QRS Mobile code to download "QRS Mobile" App from the App Store to your iPhone or iPad. You can also search "QRS Mobile" from the App Store.

Move the switch on the DIR-505 to "Router/AP Mode" and plug it into a wall outlet. From your iOS mobile device, click Settings. Then, click Wi-Fi.

Wireless Utility displays the available wireless networks and select the Wi-Fi name that is shown on your companion card (ex: **dlink-a8fa**). Then, enter the Wi-Fi password included in your card (ex: **akbdj19368**).

Once it connected, click on the QRS Mobile icon from your iOS mobile device. Then click Start to continue.

Please follow the on-screen instructions to complete the setup.

Once the screen appears, you have successfully completed the setup. Please click Save and write down the Wi-Fi Name (SSID) and password on your companion card for future reference.

From your iOS mobile device go to your wireless utility to display the available wireless networks and select the network that you created for internet access.

Router/Access Point Mode

-
-
-
-
-

Find an outlet close to an Internet-enabled device. Then, move the switch to "Router/AP Mode" and plug the DIR-505 into a wall outlet. Verify that the power LED has turned green.

Connect one end of the Ethernet cable into the Ethernet port of the Internet-enabled device (e.g. modem, router) and then plug the other end of this cable into the Ethernet port of the DIR-505.

From your laptop or mobile device go to your Wireless Utility to display the available wireless networks and select the Wi-Fi name that is shown on your companion card (ex: **dlink-a8fa**). Then, enter the Wi-Fi password included in your card (ex: **akbdj19368**).

Open a web browser. First time users will automatically be directed to the pre-wizard. Please follow the on-screen instructions to complete the setup. If this is your second time type <http://dlinkrouter> (Windows) or <http://dlinkrouter.local> (Mac/iPhone/iPad) in the address bar. Once the setup is complete then proceed to the next step.

From your laptop or mobile device go to your wireless utility to display the available wireless networks and select the network that you created for internet access.

Repeater Mode

-
-
-
-
-
-

Move the switch to "Repeater Mode". Then, plug the DIR-505 into a wall outlet and verify that the power LED has turned green.

From your laptop or mobile device go to your Wireless Utility to display the available wireless networks and select the network that is displayed on your companion card (ex: **dlink-a8fa**). Then, enter the Wi-Fi password included in your card (ex: **akbdj19368**).

Open a web browser and type <http://dlinkrouter> (Windows) or <http://dlinkrouter.local> (Mac/iPhone/iPad). Please follow the on-screen instructions to complete the setup.

Select the configuration method and click Next.

For Manual configuration, select the Wi-Fi network you would like the DIR-505 to connect to wirelessly.

Enter the Wi-Fi Password and click Next. Once the second screen appears, you have successfully completed the setup. Please click Save and write down the Wi-Fi Name (SSID) and Password on your companion card for future reference.

From your laptop or mobile device go to your wireless utility to display the available wireless networks and select the network that you previously connected to in Step 5 for internet access.

Wi-Fi Hot Spot Mode

1

Move the switch to "Wi-Fi Hot Spot". Then, plug the DIR-505 into a wall outlet and verify that the power LED has turned green.

2

From your laptop or mobile device go to your Wireless Utility to display the available wireless networks and select the network that is displayed on your companion card (ex: **dlink-a8fa**). Then, enter the Wi-Fi password included in your card (ex: **akbdj19368**).

3

Open a web browser. First time users will automatically be directed to the pre-wizard. Please follow the on-screen instructions to complete the setup. If this is your second time type **http://dlinkrouter** in the address bar. Click **Launch Wireless Setup Wizard** to continue.

4

Select the Wi-Fi Hotspot you would like DIR-505 to connect to and then click **Connect** to continue. Then, enter the Wi-Fi password and click **Next** to continue.

5

Uncheck the box if you wish to use your own Wi-Fi Network Name. Then, enter your own Wi-Fi network name & password in the boxes. When the second screen appears, you have successfully completed the setup. Click **Save** and write down the SSID & password in your companion card for future reference.

6

From your laptop or mobile device go to your wireless utility to display the available wireless networks and select the network that you created in step 5.

SharePort Mobile (Only Works with Router & Wi-Fi HotSpot Mode)

1

Move the switch to **Router/AP Mode**.

Note: Shareport Mobile only works on Router and Wi-Fi HotSpot Mode. It does not work on AP or Repeater Mode.

2

Insert your USB flash drive to DIR-505 first and then Plug DIR-505 into wall outlet.

Note: The DIR-505 supports FAT32 and NTFS USB format. Also, if your USB storage contains more than 1000 files (total size over 500GB), please be patient as it will take more time to sort out all the files in your storage.

3

Scan the bar code or search the app from the Google Play or iTunes store to download the **Shareport Mobile App** to your iPhone, iPad or Android devices. Once the application has been downloaded, continue to the next step.

4

From your mobile device, click **Settings**.

5

Click **Wi-Fi** and select the Wi-Fi name (SSID) that you assigned during initial setup. Then, enter your Wi-Fi password.

6

Once connected click on the **SharePort Mobile** icon. Then, the following screen will pop up.

7

Click on the **Settings** icon located on the right top corner of the screen. Then, click **Edit** to enter your User Name and Password (refer to the **Create User** section below). Once you finish, click **Done** to continue. By default, User Name is "admin" and Password is blank.

Note: If you set the password for the "admin" in your DIR-505, you need to enter the password.

8

For the Movie section, click the **Movie** icon to play your movie from your USB flash drive.

Note: iOS supports video formats such as MP4 and MOV. Android supports MP4 and MOV video formats.

9

For the Music section, click the **Music** icon to play your music from your USB flash drive.

Note: iOS support MP3 & WAV music formats. Android supports MP3 & WAV.

10

For the Photo section, click the **Photo** icon to open your photo from your USB flash drive.

Note: iOS & Android both support the following image formats : JPG, BMP, GIF, PNG.

11

For the Files section, click on the **Files** icon to open your file from your USB flash drive.

Note: iOS and Android both support the following document formats: html, key, pages, numbers, txt, ref, doc, PPT, XLS, Pdf.

12

For the Folder section, click on the **Folder** icon to open a file from your USB flash drive. To upload a photo file from your mobile device to your USB go to + sign located on the upper right.

13

Once you open a file, you may add this file to your **Favorite** folder by selecting the "Star" icon. For the Favorite section, click on the **Favorite** icon to open your favorite file from your USB flash drive.

SharePort Mobile - Create User

1

Make sure your laptop or mobile device connect to the DIR-505. Enter **http://dlinkrouter** in the URL, go to **SETUP -> STORAGE**. Make sure "Enable SharePort Web Access" is checked.

2

Create your own **User Name** and **Password**, then click **Add/Edit** to add your user name and password.

3

Click **Modify** to modify the user settings. Then, click **Browse** to locate the folder you would like to use.

4

Click on the folder you want to open (i.e. **usb_A1**). Select **Read Only** or **Read/Write** and Click **Ok** to continue. Once you complete all the setting, click **Save Setting** to continue.

Technical Support

U.S. and Canadian customers can contact D-Link technical support through our web site or by phone. You can find software updates and user documentation on the D-Link website as well as frequently asked questions and answers to technical issues.

Before you contact technical support, please have the following ready:

- Model number of the product (e.g. DIR-505)
- Hardware Revision (located on the label on the bottom of the product (e.g. rev A1))
- Serial Number (s/n number located on the label on the bottom of the product).

Maximum wireless signal rate derived from IEEE Standard 802.11g, 802.11a and 802.11n specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental conditions will adversely affect wireless signal range.

Product specifications, size and shape are subject to change without notice, and actual product appearance may differ from that depicted on the package. Visit dlink.com (US) or dlink.ca (Canada) for more details.
