Requirements for your Home/Office

- Wired or Wireless Internet Connection
- A Wired or Wireless Network Device (Tablet, Smartphone, Mac or Windows Computer)
- Power Outlet

Package Contents

- 1x Dual Band Wireless N Range Extender
- 1x 12V/1.25A Power Adapter
- 1x Ethernet Cable
- 3x 3dBi Dual Band Antenna

1 A. Hardware Setup

A. Attach the Antennas to the Extender.

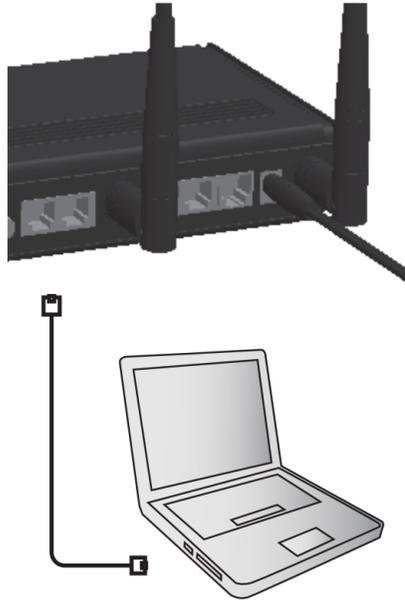

Locate the antennas provided with the HD45X and attach them to the antenna jacks on the HD45X.

B. Plug in the Power Adapter.

When you have completed the antenna setup, plug the included power adapter into the nearest power outlet.

C. (Optional): Only do this step if you are intending to configure the HD45X using a wired connection. Otherwise, proceed to step 2.)

Using an ethernet cable, connect your computer to any one of the 5 Wired LAN Ports located on the back of the router. Proceed to step 3.

B. Find an Optimal Location

Your Hi-Gain™ Dual Band Wireless N Range Extender should be placed in optimal location within the range of your wireless network.

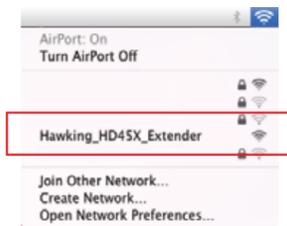

Make sure the Extender is placed in a location where it can receive a strong signal from your desired wireless Internet connection. The Extender will not work without a signal it can repeat.

2 Configuring your Extender using a WiFi enabled device.

(For a wired connection, do Step 1c, then proceed to Step 3.)

Using a Mac Computer

Click the wireless network icon in the upper right corner of the Finder tool bar. Select the "Hawking_HD45X_Extender" network from the drop-down menu. Then Continue to Step 3A.

Using a Windows Computer

Look for the "Wireless Network" icon on the lower right of the Windows taskbar, Click on the Icon and Select "Hawking_HD45X_Extender" Network. Then Continue on to Step 3A.

Using an iPad® or an iPhone®

Make sure JavaScript is On: Go to Settings > Select Safari (a) > make sure JavaScript is ON (b).

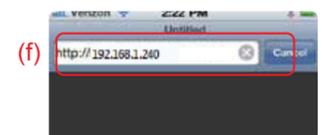

Go back to Home Screen > Select Settings > In Wi-Fi Networks, Select "Hawking_HD45X_Extender" (c). Make sure your Wi-Fi is connected to the range extender (d).

Go back to Home Screen(e) > open your Safari Browser

Then, type in <http://192.168.1.240> (f). Continue on to Step 3B.

Using an Android mobile device

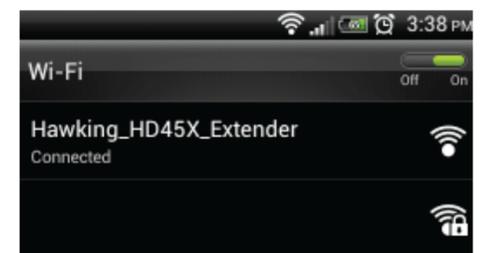

On your mobile device, locate the "settings" menu and select "Wireless & Networks".

Click "Turn on Wi-Fi" and then click on the "Wi-Fi Settings" option

Look for "Hawking_HD45X_Extender". Select it to connect.

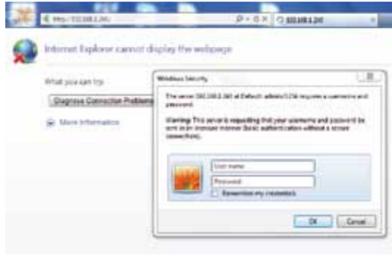

3 Connecting to your Dual-Band Range Extender

A. Using the same computer, open a web browser and type in the following web address in the web address bar: <http://192.168.1.240>

Once the page loads, enter the following login information:

Login: admin Password: 1234
Click **Login** to continue.

If this page does not load or you need to get back into the unit, you can reset the device by holding the reset button for 15 seconds, power off/on. If running Windows, you may also run the setup software to find the device.

B. Click 'Scan' to find your wireless Internet connection. Select a network you would like to extend, 2.4GHz or 5GHz, and click 'Connect'.

i The 2.4GHz networks will appear in blue and 5GHz networks will appear in orange. While you can select a 2.4GHz network, if available we recommend connecting to a 5GHz network to optimize your speed and throughput.

If the signal strength is low or your network does not appear, you may need to adjust the location of your HD45X. Click 'Scan' to try again.

Band	Channel	SSID	Encryption	Authentication	Signal
2.4	1		WEP	OPEN	15
2.4	3		AES	WPA2PSK	52
2.4	3		AES	WPA2PSK	100
2.4	10	Hawking_HD45R_2.4GHz	NONE	OPEN	100
2.4	11		AES	WPA2PSK	15
5	36	Hawking_HD45R_5GHz	NONE	OPEN	100

C. The Quick Setup will now prompt you to enter a security key only if the network you are connecting to is encrypted. Enter the key and click 'Continue'.

Note: If there is no security on the original network, this step will automatically be skipped.

The wireless network you are trying to connect has wireless security enabled. Please enter the security code below.

If you do not know your security code, please contact the network administrator.

If you do not know the security key of the network you are connecting to, please consult your network administrator.

4 Finishing Up

The setup of your HD45X is now complete. A summary page will appear with all your settings. If anything is incorrect, click back to re-enter your settings. Click Finish to complete your setup. The HD45X will automatically reboot and start repeating and extending your wireless network.

Congratulations, you have completed the setup of your H-Gain™ Dual Band Wireless N Range Extender

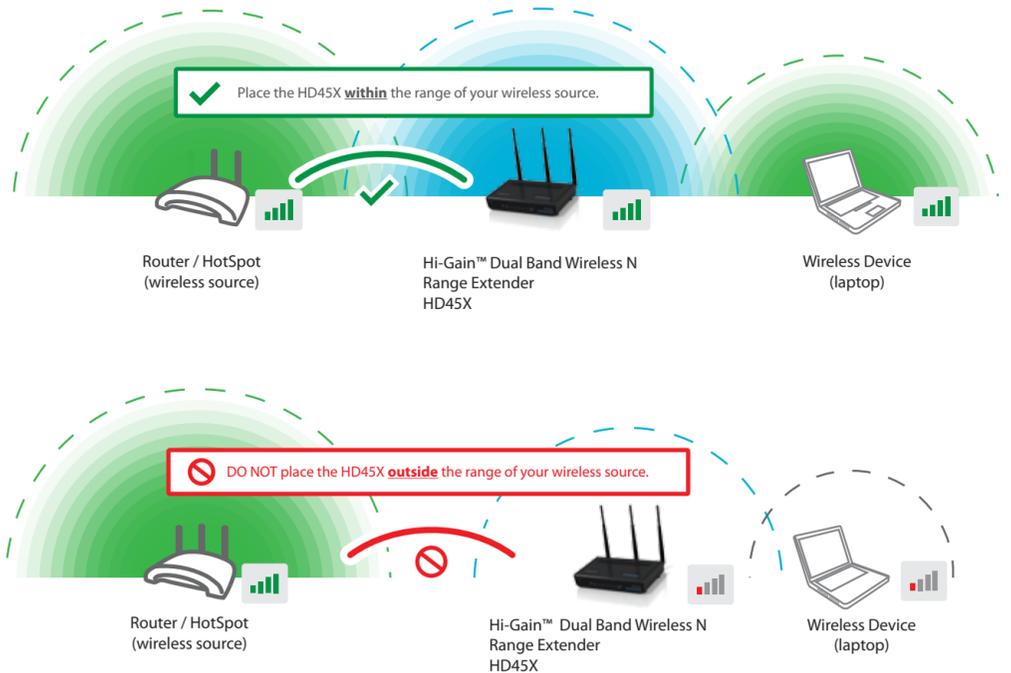

Wireless Configuration
Range Extender ID: Hawking_HD45X_Extender
Wireless Source Access Point ID:
Wireless Channel: 3
Wireless Encryption Security: WPA-shared key

Click Back if you wish to change any of the setting above. Click Finish to apply your settings.

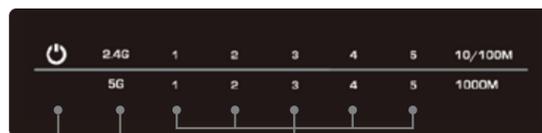

Back Finish

i After the reboot, the HD45X will join the original network and will no longer be listed as "Hawking_HD45X_Extender". It will automatically be renamed to your original network, unless it was specified during the set up process. **If you wish to modify this name, please refer to the user's manual.**

Placing your Dual Band Range Extender in an Optimal Location

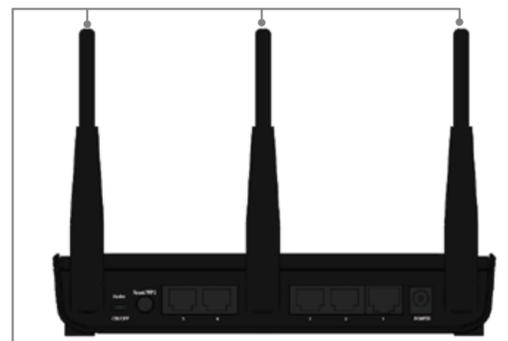

LED Description

- Power**
 - LED is on, when the power adapter is connected and plugged into an outlet
- Wireless**
 - LED is on, [blinking] when wireless data activity is detected. 2.4G is 2.4GHz wireless, 5G is 5GHz wireless
- Wired**
 - LED is on, when an ethernet cable is plugged into the ethernet port
 - Top # corresponds to 10/100M connections, bottom is for 1000M connections

Back Panel Description

- Removable Antennas**
Removable 3dBi Omni-Directional Antennas
- Wireless Radio On / Off Switch**
Turns on / off the wireless functions
- Reset Switch / WPS**
Resets your extender to its default settings / WPS Setup
- LAN Ports**
Connects your wired network devices and computers to your network
- Power [12V / 1.25A]**
