

Let's get started >

#### Hardware Installation

1. Attach the supplied antenna to the back of the **N3G007W**.
2. With the supplied Ethernet cable, connect your computer to the LAN port of the **N3G007W**.
3. Connect a compatible 3G USB modem to the USB socket on the back of the **N3G007W**.
4. Connect the supplied Power Adapter to the wall power outlet and to the socket labelled Power on the **N3G007W**.
5. Wait for 2 minutes to allow the **N3G007W** to power up.

### Connecting your device

#### For 3G Connections

1. After completing the hardware installation as detailed on the front page, open a web browser (such as Internet Explorer, Firefox or Safari), type **192.168.123.254** into the address bar and press **Enter**
2. Enter the default password **admin** into the system password field and press **Login**
3. This will take you to the setup wizard where you set-up your 3G connection

4. Choose your 3G ISP from the drop down list titled **Choose your 3G Network**
5. The APN details for your 3G ISP will automatically update

**NOTE:** You will not need to enter any further details into any of the other fields in this screen unless:

- Your SIM card requires a PIN code
  - Your 3G ISP requires you to input the username/password for your 3G connection
  - You wish to use alternate 3G connection details (such as special APN)
6. Press **Apply Settings**. Wait while the 3G Router applies these settings
  7. You will be taken to the **Status** page of the 3G Router
  8. You can check that the connection was successful if **Connected** appears in the **Link Status** under 3G Modem Information

**NOTE:** This may take up to one minute to appear

9. If connection is successful you are able to browse the Internet and share your connection wirelessly

#### For Fixed Line Connections

1. Connect your fixed line (ADSL/Cable) Modem to the WAN port on the back of the N3G005W
2. Open a web browser (such as Internet Explorer, Firefox or Safari), type **192.168.123.254** into the address bar and press **Enter**
3. Enter the default password **admin** into the system password field and press **Login**
4. Click on the **Advanced Setup** tab at the top of the screen
5. Click on the **Basic Settings** submenu
6. Select **Primary Setup** from the menu on the left of the screen
7. Under **WAN Type** select **Dynamic IP Address**. Press **Save**
8. Wait 2 minutes for the system to restart
9. At this stage, you should be connected to the Internet via fixed line. You can check connection details by looking under **WAN Status** on the **Status** page. If connected there will be information filling this field.

### Establishing a Wireless Connection:

You can connect multiple wireless devices, including laptops, desktops and PDA's to your **N3G007W** by following the 2 basic steps.

1. Using your wireless device, scan the wireless networks in your area and select the network called **netcomm n3g series**, then click connect.
2. Enter the following default security key: **a1b2c3d4e5**

**Note** To ensure wireless security, we recommend you change the default settings through the Configuration Interface. For more detail, please consult the User Guide.
